### Intersection Summary

|                              |      |
|------------------------------|------|
| HCM 7th Control Delay, s/veh | 34.5 |
| HCM 7th LOS                  | C    |

### Notes

\* HCM 7th Edition computational engine requires equal clearance times for the phases crossing the barrier.

## Intersection Summary

|                              |      |
|------------------------------|------|
| HCM 7th Control Delay, s/veh | 33.4 |
| HCM 7th LOS                  | C    |

## Notes

\* HCM 7th Edition computational engine requires equal clearance times for the phases crossing the barrier.

**MEMORANDUM**

**DATE:** March 03, 2023

**To:** Linda J Hakimi, PE

**FROM:** Ambarish Mukherjee, P.E., AICP

**SUBJECT:** Silicon Valley Ranch Residential Project Vehicle Miles Traveled (VMT) Analysis Memorandum

LSA has prepared a Vehicle Miles Traveled (VMT) Analysis Memorandum (Memo) for the proposed Silicon Valley Ranch residential development (project) in the City of Hanford (City). The project will be located at the southwest corner of 12th Ave and Hanford-Armona Rd (south of State Highway 198) in the City. The Project proposes to develop 22 acres with up to 342 single family dwelling units.

**BACKGROUND**

On December 28, 2018, the California Office of Administrative Law cleared the revised California Environmental Quality Act (CEQA) guidelines for use. Among the changes to the guidelines was removal of vehicle delay and level of service from consideration under CEQA. With the adopted guidelines, transportation impacts are to be evaluated based on a project's effect on vehicle miles traveled (VMT).

The project is located within the jurisdiction of City of Hanford. The City recently adopted its Senate Bill 743 (SB 743) guidelines, and therefore, the VMT analysis has been based upon the methodology and significant threshold criteria identified in the "City of Hanford - VMT Thresholds and Implementation Guidelines, November 2022" (guidelines).

The guidelines include multiple screening criteria for small to medium sized land use projects to be screened out of a detailed VMT analysis. The project was reviewed with all screening criteria from the guidelines and it was determined that the project doesn't meet any screening criteria. Therefore, a detailed VMT analysis was conducted for the project.

**VMT Metrics and Thresholds**

The project consists of residential land uses only and the guidelines established use of VMT per capita to evaluate residential land uses. Also, as per the guidelines, the definition of the region was established as Kings County and the threshold for evaluation of land use projects was established as 13%. Therefore, the project will constitute a significant impact if the project VMT per capita is greater than 87% of the baseline VMT per capita of Kings County. Numerically, based on the guidelines if the project VMT per capita is greater than 8.99, then project will have a significant VMT impact.

The Kings County Association of Governments (KCAG) Travel Demand Model (TDM) is the regional travel demand model applicable to jurisdictions within Kings County including the City for evaluating project VMT. Therefore, based on the guidelines, KCAG TDM was used to conduct project VMT analysis.

### Project Traffic Analysis Zone Update

To calculate the project VMT, the first step was to update the TAZs in the model that include the project area. The project should be isolated in the travel model to estimate project VMT. KCAG TDM includes ability to add new TAZs. One new TAZ was used to model the project land use. The project land use (dwelling units) was input into the model as households in the newly created zone for modeling purposes. No project specific network modifications were conducted. Model run was conducted for existing/base year scenario with updated model inputs. The outputs from this updated model run were utilized to estimate project specific VMT metrics.

### VMT ANALYSIS

As mentioned above, the outputs from the updated model run were used to estimate project VMT per capita. Table A shows the VMT analysis results using the county as the region. As shown in Table A, VMT per capita metric for the project is 6.9% higher than the regional threshold. As mentioned above, the regional/countywide average VMT per capita and the threshold were obtained from the City's guidelines (Table E: Significance Thresholds for VMT Analysis).

**Table A: Project and Threshold VMT per Capita**

|                       | <b>Silicon Valley Ranch<br/>(project)</b> | <b>City of Hanford VMT<br/>Threshold *</b> | <b>Difference</b> | <b>Percentage<br/>Difference</b> |
|-----------------------|-------------------------------------------|--------------------------------------------|-------------------|----------------------------------|
| <b>VMT per capita</b> | 9.61                                      | 8.99                                       | 0.62              | 6.9%                             |

*Source: Kings County Association of Governments (KCAG) Travel Demand Model*

*\* Threshold obtained from City of Hanford VMT Thresholds and Implementation Guidelines, November 2022*

*Threshold is 87% of regional baseline ( $10.33 \times 0.87 = 8.99$ )*

### Conclusion

As mentioned before, the project consists of residential land uses only. The City's guidelines recommend use of VMT per capita to evaluate residential projects. Also, based on the guidelines the project would constitute a significant VMT impact if the project VMT per capita is greater than 87% of the baseline Kings County VMT per capita. As shown in Table A, the project VMT per capita is higher than the threshold and hence the project has a significant VMT impact.

Detailed VMT calculation for the project is included in Appendix A.

## **NOTICE OF AVAILABILITY FOR PUBLIC REVIEW AND HEARING ON THE DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE PROPOSED SILICON VALLEY RANCH RESIDENTIAL DEVELOPMENT PROJECT**

This is to advise that the City of Hanford has prepared an Environmental Impact Report (EIR) for the project identified below. As mandated by State law, the minimum public review period for this document is 45 days.

### ***Project Name and Description***

Silicon Valley Ranch Residential Development Project – a request to construct 326 single-family residences, internal roads, a 2.86-acre drainage retention basin, and a 3.58-acre park on an approximately 88.9-acre site (Project). An approximately 13.87-acre portion of the site at the northeast corner of the property is intended to be removed via a lot-line adjustment. The Project is within the City of Hanford's Sphere of Influence (SOI) but will be annexed into the City limits through annexation.

### ***Project Location***

The Silicon Valley Ranch Residential Development Project is located south of Hanford Armona Road, in the sphere of influence of the City of Hanford. The Project encompasses approximately 88.9 acres (APN 011-040-008, 010, and 027)

**COMMENT PERIOD:** November 25, 2024 to – January 9, 2025 (45 days)

**PUBLIC HEARING AND COMMENT:** The City of Hanford is soliciting comments on the adequacy and completeness of the analysis and proposed mitigation measures described in the Draft EIR. You may comment by providing testimony at the public hearing on:

**DATE:** Tuesday, January 14, 2025

**TIME:** 5:30 p.m.

**LOCATION:** Council Chamber of the City of Hanford Civic Auditorium, 400 N. Douty Street, Hanford, CA.

The document and documents are available for review at the City of Hanford, Community Development Department located at 317 N. Douty Street, and at the Hanford Branch Library located at 401 Douty Street, Hanford, CA 93230 or <https://www.cityofhanfordca.com/1236/Current-Frindex>; or <https://coganet.org.ca.gov/2024060956>

**HOW TO COMMENT:** You may provide testimony at the public hearing on the date and time specified above or provide written comments prior to the close of public comment period on Tuesday, January 14, 2025, at 5:30 p.m. to: Senior Planner, Gabrielle Myers, 317 N. Douty Street, Hanford, CA 93230 or via email: [gmyers@hanfordca.gov](mailto:gmyers@hanfordca.gov)

**FINDINGS OF FACT IN SUPPORT OF FINDINGS  
RELATED TO SIGNIFICANT ENVIRONMENTAL IMPACTS**

**State CEQA Guidelines Section 15091**

**for**

**Silicon Valley Ranch Residential Development (Tract No. 943) Project**

**Final Environmental Impact Report  
SCH# 2024060956**

**Lead Agency: City of Hanford**

**SECTION I. INTRODUCTION**

The following findings of fact are based in part on the information contained in the draft and final Environmental Impact Report (EIR) for the Silicon Valley Ranch Residential Development Project (Project) as well as additional facts found in the complete record of proceedings. The final focused EIR is hereby incorporated by reference and is available for review at the City of Hanford (City), City of Hanford Community Development Department, 317 N Douty St, Hanford, CA 93230.

**SECTION II. FINDINGS REGARDING THE POTENTIAL ENVIRONMENTAL EFFECTS  
OF THE PROJECT**

The City issued a notice of preparation of a draft focused EIR on June 21, 2024. Based on the initial study, technical studies and Notice of Preparation, a determination was made that the final focused EIR would contain a comprehensive analysis of environmental issues not screened out during the Notice of Preparation. With respect to all impacts identified as “less than significant” or as having “no impact” in the final focused EIR, the Planning Commission finds that those impacts have been described accurately and are less than significant or have no impact. Despite concluding that certain impacts would be less than significant or would have no impact, the final focused EIR nonetheless incorporates mitigation measures in the form of complying with the goals, policies, and implementation measures of the City of Hanford General Plan or other adopted regulations. The Planning Commission finds that these effects are less than significant or have no impact before and after implementation of these mitigation measures.

In addition, one impact in the final focused EIR were found to be “significant and unavoidable.” The Planning Commission finds that this impact has been described accurately and is significant and unavoidable.

**LAND USE AND PLANNING**

***A. Environmental Effects of the Project Found to Have No Impact on the Environment or Have a Less Than Significant Impact on the Environment.***

*The Project could cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect (Impact 4.2-1)*

The City of Hanford General Plan establishes land use policies and regulations that are applicable to the Project. In addition to the City of Hanford General Plan, applicable policies and regulations of the Kings County General Plan and Kings County LAFCo were identified as they pertain to annexations of land.

The Project site has a General Plan designation of Low Density Residential and would be rezoned R-L-5. Per the City General Plan zoning matrix, the R-L-5 zone district is compatible with the General Plan designation. Approval of the tentative map subject to the provisions of the City of Hanford municipal code would allow subdivision of the Project area into lot sizes consistent with the R-L-5 zone district. Pursuant to Table 17.08.020, the proposed development of single-family dwellings throughout the subdivided Project area are permitted uses under the R-L-5 zone district.

The Project is consistent with the goals and policies of the City of Hanford General Plan and Kings County General Plan. Therefore, the Project would not conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the Project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigation an environmental effect. Impacts of the Project are less than significant, and no mitigation is required.

***B. Environmental Effects of the Project that Are Potentially Significant, but that Can Be Mitigated to Less Than Significant Levels.***

The Project would not have any environmental effects on land use and planning that are potentially significant and that can be mitigated to less than significant levels.

***C. Effects of the Project that Cannot Be Mitigated to a Level Less Than Significant.***

The Project would not have any environmental effects on land use and planning that cannot be mitigated to a less than significant level.

**Findings**

The proposed Project would not have any potentially significant environmental effects related to land use and planning. No mitigation would be required, and impacts are less than significant.

**Level of Significance**

Impacts would be less than significant.

**Brief Explanation of the Rationale for the Finding**

CEQA requires that all feasible and reasonable mitigation be applied to the project to avoid or substantially lessen significant impacts. However, impacts related to land use and planning would be less than significant, and no mitigation measures are required.

***D. Cumulative Environmental Effects of the Proposed Project that Would Have a Less Than Significant Impact on the Environment.***

As discussed in the Cumulative Project List section of the draft EIR, 12 similar projects are proposed within a one and a half-mile radius of the proposed Project, the geographic scope being the City of Hanford General Plan planning area. The Project and future development are required to be consistent with the City of Hanford General Plan and other applicable planning documents. Cumulative projects requiring additional

consideration including rezones, General Plan Amendments, and annexation would require approval by the County. Consistency with the City's applicable General Plan policies and Zoning Ordinance (and any other applicable planning documents) would ensure compliance and orderly development of the proposed Project and other related cumulative projects. Additionally, all cumulative projects are subject to environmental review and compliance with all federal, State, and local policies and plans. As such, the proposed Project's incremental contribution to the less than significant cumulative impacts would not be cumulatively considerable. Cumulative impacts related to land use and planning would result in a less than significant impact on the environment.

***E. Cumulative Environmental Effects of the Proposed Project that Would Have a Significant Impact on the Environment.***

The Project would not have any cumulative effects on land use and planning that would have a significant impact.

**Findings**

The proposed Project would not have any potentially cumulative significant environmental effects related to land use and planning. No mitigation would be required and impacts are less than significant.

**Level of Significance**

Impacts would be cumulatively less than significant.

**Brief Explanation of the Rationale for the Finding**

CEQA requires that all feasible and reasonable mitigation be applied to the project to avoid or substantially lessen significant impacts. However, cumulative impacts would be less than significant, and no mitigation measures are required.

**TRANSPORTATION AND TRAFFIC**

***A. Environmental Effects of the Project Found to Have No Impact on the Environment or Have a Less Than Significant Impact on the Environment.***

***B. Environmental Effects of the Project that Are Potentially Significant, but that Can Be Mitigated to Less Than Significant Levels.***

*The Project could conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities (Impact 4.2-1).*

The Hanford General Plan has policies related to traffic systems. The General Plan has established LOS E as the acceptable level on streets and intersections within the area bounded by State Route (SR) 198, 10th Avenue, 11th Avenue, and Florinda Avenue, and a peak hour LOS D on all other streets and intersections within the Planned Growth Boundary. The County of Kings has established LOS D as the acceptable level of traffic congestion on County roads. Since the study facilities for this Project lie outside of the SR 198, 10th Avenue, 11th Avenue, and Florinda Avenue boundary, the LOS D threshold was utilized to evaluate the potential significance of LOS impacts to the City of Hanford roadway facilities and the County of Kings facilities.

Signal warrant criteria was met for the 13<sup>th</sup> Avenue and Hanford Armona Road intersection; however, it is important to note that a signal warrant defines the minimum condition under which signalization of an intersection might be warranted. Meeting this threshold does not suggest traffic signals are required, but rather, that other traffic factors and conditions be considered to determine whether signals are truly justified. Pursuant to General Plan Policy T36, the Project proponent will be required to pay traffic development impact fees. The provision of an intersection signalization would be determined by the City of Hanford. Improvement costs for signalization are within the purview of traffic development impact fees as required in Policy T36, therefore eventual signalization of the intersection by the City would address the LOS deficiency caused by General Plan buildout (2044) and Project development (2044+Project).

For the 12<sup>th</sup> Avenue and Hanford Armona Road intersection, the TIA recommends improvements be made to the eastbound roadway to include changing the existing eastbound right turn lane (EBR) to an eastbound through and right turn lane (EBTR). The Project proponent would be required to pay their fair share cost for the needed improvement to ensure that the intersection by the year 2044, operates at an acceptable LOS. The inclusion of fair share cost payment is recommended as a Mitigation Measure and is included as MM 4.2-1. Implementation of MM 4.2-1 would allow the studied intersection to operate at an acceptable LOS under City LOS standards and reduce impacts to less than significant.

### ***Mitigation Measures***

MM 4.2-1: The Project proponent or developer shall be required to pay their fair share of costs for the needed improvements. This includes changing the 12<sup>th</sup> Avenue and Hanford Armona Road intersection eastbound right turn lane to an eastbound through lane and a right turn lane.

The fair share cost for the improvement is calculated at 18.94% and shall be collected by the City of Hanford at the appropriate time

### ***Level of Significance***

Impacts would be *less than significant with implementation of mitigation measures*.

### ***Finding***

The proposed Project would not have any potentially significant environmental effects related to LOS and the impacts that the Project may have on the surrounding roadway network. With implementation of Mitigation Measure MM 4.2-1 would reduce impacts to less than significant.

### ***Brief Explanation of the Rational for Finding***

CEQA requires that all feasible and reasonable mitigation be applied to the project to avoid or substantially lessen significant impacts related to General Plan policies related to LOS. Implementation of Mitigation Measure MM 4.2-1 as described above, would reduce impacts to a less than significant level.

### ***C. Effects of the Project that Cannot Be Mitigated to a Level Less Than Significant.***

*Conflict or be inconsistent with CEQA Guidelines Section 15064.3, Subdivision (b) (Impact 4.2-2)*

Land use developments meeting one or more of the screening criteria contained in the VMT Guidelines are presumed to create a less than significant transportation impact and no further VMT analysis is required. These criteria relate to project type, size, location, proximity to transit, and trip-making potential. The

project does not meet any of the screening criteria. Therefore, a detailed VMT analysis was prepared for the Project.

For projects that are not screened out, a quantitative analysis of VMT impacts must be prepared and compared against the adopted VMT thresholds of significance. According to the VMT Guidelines, residential developments that generate more than 8.99 daily VMT for residential VMT per capita would be considered to have a significant transportation impact.

Based on the VMT analysis, the Project would result in 9.61 VMT per capita and exceed the 8.99 VMT per capita threshold. As a result, it is recommended that the Project implement VMT mitigation measures for the residential component to reduce VMT per Capita. In order to reduce VMTs, a project must decrease the number of vehicle miles travels to and from the Project site. For land development projects, VMT mitigation focuses on measures that reduce the number and/or length of single-occupant vehicle trips generated by the project. These measures included increasing residential density and providing easy access to high-quality public transit within 0.5 miles of a high frequency transit station. However, there are no applicable and feasible mitigation measures available to reduce VMT below the adopted City and County thresholds. Therefore, the Project is expected to result in a significant transportation impact under CEQA

#### ***Mitigation Measures***

No mitigation measures

#### ***Level of Significance***

Impacts would be ***significant and unavoidable***

#### ***Finding***

There are no feasible and applicable mitigation measures that would be able to reduce VMT for the Project under City adopted thresholds. Therefore, impacts are considered significant and unavoidable.

#### ***Brief Explanation of the Rationale for the Finding***

CEQA requires that all feasible and reasonable mitigation be applied to the Project to reduce impacts. However, no mitigation measures were identified that are feasible and applicable to the Project that would reduce VMT under the City adopted thresholds.

#### ***D. Cumulative Environmental Effects of the Proposed Project that Would Have a Less Than Significant Impact on the Environment.***

There are no cumulative impacts related to transportation and traffic would result in a less than significant impact on the environment.

#### ***E. Cumulative Environmental Effects of the Proposed Project that Would Have a Significant Impact on the Environment.***

#### ***Significant Effect***

The Project would conflict or be inconsistent with CEQA Guidelines 15064.3, Subdivision (b). In combination with other approved or reasonably foreseeable projects, cumulative impacts to VMT would also be significant and unavoidable.

#### *Description of Significant Impact*

The Project's VMT would exceed the City's adopted VMT per capita thresholds.

#### *Finding*

There are no feasible and applicable mitigation measures that would be able to reduce VMT for the Project under City adopted thresholds. Therefore, impacts are considered significant and unavoidable. This impact is overridden by Project benefits as set forth in the statement of overriding considerations. There are no other feasible mitigation measures or changes to the Project that would reduce this impact to a less than significant level

#### *Brief Explanation of the Rationale for the Finding*

CEQA requires that all feasible and reasonable mitigation be applied to the Project to reduce impacts. However, no mitigation measures were identified that are feasible and applicable to the Project that would reduce VMT under the City adopted thresholds.

### **SECTION III. FINDINGS REGARDING CONSIDERATIONS, WHICH MAKE CERTAIN ALTERNATIVES, ANALYZED IN THE FINAL ENVIRONMENTAL IMPACT REPORT INFEASIBLE.**

The following findings and brief explanation of the rationale for the findings regarding Project alternatives identified in the EIR are set forth to comply with the requirements of Section 15091(s)(3) of the *CEQA Guidelines*.

The consideration of alternatives is an integral component of the CEQA process. The selection and evaluation of a reasonable range of alternatives provides the public and decision-makers with information on ways to avoid or lessen environmental impacts created by a Project. When selecting alternatives for evaluation, CEQA requires alternatives that meet most of the basic objectives of the Project, while avoiding or substantially lessening the Project's significant effects. Thus, the objective of the Project was considered by this board in evaluating the alternatives. This objective is to build and operate an economically viable and competitive development with a mix of commercial and residential uses in compliance with applicable laws and regulations, optimally utilizing the available land resource, and while minimizing any environmental impacts to the extent feasible. Thus, objectives for the Project were considered in evaluating the alternatives.

The Project has the following objectives:

- Provide a variety of housing opportunities with a range of styles, sizes, and values that will be designed to satisfy existing and future demand for quality housing in the area.
- Provide a sense of community and walkability within the development through the use of street patterns, parks/open space areas, landscaping, and other Project amenities.
- Create a successful and financially feasible Project by meeting the housing needs of the area.
- Provide a residential development that assists the City in meeting its General Plan and Housing Element requirements and objectives.

The alternatives considered in this EIR include two land use alternatives, a reduced construction alternative, and the No-Project Alternative. CEQA requires that alternatives that have been considered but rejected by the lead agency be addressed in the EIR. This portion of the EIR is also to determine which alternative is considered to be environmentally superior. This evaluation is to be based on which alternatives have the fewest unmitigated impacts and this comparison is to be made even for alternatives that may not completely fulfill all of the Project objectives. For the purpose of this evaluation, the following impacts were determined to be unmitigable after implementation of the mitigations recommended in the EIR.

### ***Significant Impacts Listed***

- Transportation and Traffic – The project and the project in conjunction with cumulative projects would conflict or be inconsistent with CEQA Guidelines 15064.3, Subdivision (b).

All other impacts can be mitigated to a relative level of insignificance through the implementation of the mitigation measures. Mitigation measures that reduced these impacts to a level below the Thresholds of Significance are detailed in the EIR.

### **No Project Alternative**

Under the No Project Alternative, the Project area would remain unchanged and there would be no residential units or parks constructed. Under the No Project Alternative, the Project area would remain unchanged and there would be no residential units or parks constructed. The No Project Alternative would keep the site as agriculture and remain under the jurisdiction of Kings County. As no change would occur, the Project site would continue to be consistent with the Kings County General Plan land use designation and zoning of Limited Agriculture, 10 acres (AL10). The City is also required to meet the State Regional Housing Needs Allocation (RHNA) for new housing in the City under the Housing Element of the City General Plan. The No Project Alternative would not fulfill the objectives of the Project or assist the City in meeting RHNA. With regard to transportation impacts, the No Project Alternative would result in no new trips generated

The No Project Alternative would reduce the significant and unavoidable impact relating to VMT; however, the City is required to meet the State Regional Housing Needs Allocation (RHNA) for new housing in the City. The No Project Alternative would not fulfill the objectives of the Project or assist the City in meeting RHNA.

### **Reduced Project Alternative**

This alternative would decrease the number of single-family residential houses from 326 to 242. As described in this draft EIR, the proposal to approve the tentative tract map, annex the site into the City, and rezoning the site to R-L-5 would remain the same. A similar outcome to the proposed Project would occur with regard to County and City General Plan consistency. The annexation would meet County and LAFCo objectives in addition to providing planned City expansion within their SOI. This alternative will meet all Project objectives but would have a reduced positive effect of assisting the City in meeting regional housing needs. Under this Alternative, overall VMT for the Project would decrease; however, per capita VMT impacts would remain *significant and unavoidable*.

With regard to City LOS thresholds, overall trip generation would be reduced, resulting in lessened impacts on studied intersections. However, this reduction is still likely to exceed LOS thresholds cumulatively, and require mitigation as indicated in this draft EIR to improve the impacted intersection of 12<sup>th</sup> Avenue and Hanford Armona Road. Impacts regarding LOS would continue to be *less than significant with mitigation incorporated*.

## **Multi-Family Alternative**

This alternative would replace the proposed single-family residential with multi-family apartments at a density of at least 14.5 dwelling units per gross acre (1,088 units). The Project site is currently designated by the General Plan for low-density residential and rezoned R-L-5. The proposed Project request would be modified to include a General Plan Amendment and a Zone Change to Medium Density Residential (R-M) to allow multi-family apartments. With regard to the addition of a General Plan Amendment, consistency findings with General Plan goals and policies would be necessary to determine if the proposed Medium Density Residential land use would comply.

Under this Alternative, the overall density increase would result in higher trips generated. This would, in turn, cause impacts to LOS and VMT. For LOS, a rise in vehicle trips generated due to an increased number of residents originating from the Project site would result in higher utilization of intersections in the vicinity of the site. Based on this assumption, the higher utilization could negatively impact LOS for the studied intersections and would potentially require additional mitigation/improvements to intersections to meet LOS standards.

With regard to the adopted screening criteria and VMT thresholds, Alternative C does not meet the screening criteria and would likely generate more than 1,000 average daily trips, is not located within 0.5 miles of a transit priority area and is not located within an area where existing VMT per capita is low. An increase in density over the national average (9.1 dwelling units per acre) can result in a VMT reduction. Assuming no change in the amount of developable land, the project would need at least 455 dwelling units to reach the national average and be credited for any reduction in project VMT. Moreover, the project would require a total of 590 dwelling units to mitigate the impact of project VMT to a less than significant level. Therefore, VMT under this Alternative would result in a less than significant impact.

## **Different Site Alternative**

This alternative would relocate the Project to a different site in order to be located nearer to corridor mixed use where a mix of commercial and office uses would be available in addition to be located closer to major transit corridors. This alternative would place the Project on the east side of the City, bounded by Lacey Boulevard to the south, 9 1/4 Avenue to the west, SR 43 to the west, and Grangeville Boulevard to the north. This alternative will meet all Project objectives and would assist the City in meeting its regional housing needs.

With regard to LOS standards, the alternative site would require an analysis of intersections in the vicinity of the site and the comparisons of future conditions at the chosen intersections. It can be determined that under Alternative D, impacts to LOS at intersections could occur similar to the proposed Project, overall VMT for the Project could decrease slightly; however, per capita, VMT would remain the same as the proposed Project. Impacts would continue to be significant and unavoidable. In addition, the applicant does not currently own either of these properties and it is not known if the current owners are willing to sell these properties.

## ***Environmentally Superior Alternative***

An EIR is required to identify the environmentally superior alternative from among the range of reasonable alternatives that are evaluated. Section 15126.6(e)(2) of the CEQA Guidelines requires that an environmentally superior alternative be designated, and states, “[I]f the environmentally superior alternative is the No Project Alternative, the EIR shall also identify an environmentally superior alternative among the other alternatives.” In Chapter 6-Alternatives, Table 6-1 displays the environmental impacts of alternatives to the Project in terms of the impact areas that were analyzed in this Draft EIR in Chapter 4,

Environmental Impact Analysis. As shown, the Multi-Family Alternative would be considered the environmentally superior alternative.

Selection of an environmentally superior alternative is based on an evaluation of the extent to which the alternatives reduce or eliminate the significant impacts associated with the Project on a comparison of the remaining environmental impacts of each alternative. In conducting this comparative evaluation, it can be difficult to make a determination of relative significance because some categories are relatively more or less important and cannot be simply summed. In some cases, these categories do not create a picture of the nuances of the alternatives.

***Finding:*** The Planning Commission finds that the No Project alternative is the environmentally superior alternative, but that the No Project Alternative would be less desirable than the Project because it would not achieve any of the Project objectives.

***Facts Supporting the Finding:*** The EIR contains facts and analyses supporting the Finding, some of which are set forth here. The No Project Alternative would not help the City to meet the required RHNA for new housing in the City. The Alternative would not fulfill the objectives of the Project. Demand for residential development would be met by other projects that may have greater impacts than the proposed Project. Moreover, employment opportunities would not be generated for construction workers in Handford or Kings County. In short, the No Project Alternative does not meet overall Project objectives.

#### ***Environmentally Superior” Build Alternative”***

Where, as here, the environmentally superior alternative is the” No Project Alternative”, the State CEQA Guidelines require the identification of an environmentally superior alternative from among the remaining alternatives. (CEQA Guidelines, Section 15126.6(e)(2).)

***Finding:*** The Planning Commission evaluated the Project and Alternatives A, B, C and D to the Project, and finds that Alternative D is the environmentally superior alternative. Alternative C – Multi-Family would reduce significant and unavoidable environmental impacts relating to VMT while fulfilling most of the objectives of the proposed Project. However, while Alternative C would incrementally reduce many environmental impacts of the Project, it would not reduce significant and unavoidable impacts of the Project to below a level of significance. Moreover, it may not be economically feasible to implement, thereby impeding the ability to meet the Project objectives set forth by the applicant.

## STATEMENT OF OVERRIDING CONSIDERATIONS

### State CEQA Guidelines Section 15093

for

### Silicon Valley Ranch Residential Development (Tract No. 943) Project

#### Final Environmental Impact Report (SCH# 2024060956)

#### Lead Agency: City of Hanford

The California Environmental Quality Act (CEQA) allows a public agency to balance the benefits of a proposed Project against its significant unavoidable adverse impacts in determining whether to approve the Project. Section 15093 of the CEQA Guidelines states:

CEQA requires the decision making agency to balance, as applicable, the economic, legal, social, technological, or other benefits of a proposed Project against its unavoidable environmental risks when determining whether to approve the Project. If the specific economic, legal, social, technological, or other benefits of a proposed Project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered “acceptable.”

As discussed in more detail in the final EIR and CEQA Findings of Fact (Section 15091), the Project will result in environmental impacts related to Vehicle Miles Traveled (VMT), which cannot be feasibly mitigated by the implementation of mitigation measures, will remain significant and unavoidable adverse impacts. These significant unavoidable impacts are summarized below and constitute those impacts for which this Statement of Overriding Considerations is made. These impacts are summarized below and constitute those impacts for which this statement of overriding considerations is made.

#### Significant and Unavoidable Impacts

1. Transportation and Traffic The Project’s Vehicle Miles Travelled (VMT) and Cumulative VMT would exceed the City’s VMT thresholds and is considered significant and unavoidable.

CEQA requires that all feasible and reasonable mitigation be applied to the Project to reduce impacts. However, no mitigation measures were identified that are feasible and applicable to the Project that would reduce VMT under the City adopted thresholds. The Project would conflict or be inconsistent with CEQA Guidelines 15064.3, Subdivision (b). In addition, in combination with other approved or reasonably foreseeable projects, cumulative impacts to VMT would also be significant and unavoidable.

#### Findings

The City Planning Commission (Commission) finds and determines in recommending approval of the development of the Project that it has considered the identified means of lessening or avoiding the Project’s significant effects. The Commission further finds and determines that the specific economic, legal, social, technological, or other benefits, including region-wide or statewide environmental benefits of the project, as discussed below, outweigh its unavoidable adverse environmental effects. Therefore, this Commission

finds and determines in recommending approval that such benefits override, outweigh, and make “acceptable” any such remaining environmental impacts of the project (CEQA Guidelines Section 15092 (a) and (b)).

The following benefits and considerations outweigh such significant and unavoidable adverse environmental impacts. All of these benefits and considerations are based on the facts set forth in the findings, the final focused EIR, and the record of proceedings for the project. Each of these benefits and considerations constitutes a separate and independent basis that justifies approval of the project, so that if a court were to set aside the determination that any particular benefit or consideration justifies project approval, the Commission would stand by its determination that the remaining benefits or considerations are sufficient to justify and substantiate project approval.

### **Facts in Support of Statement of Overriding Considerations**

The objective of the Project is to build and operate an economically viable and competitive development with residential uses in compliance with applicable laws and regulations, optimally utilizing the available land resource, and while minimizing any environmental impacts to the extent feasible.

Each benefit set forth below constitutes an overriding consideration warranting approval of the project, independent of the other benefits, and the City Council determines that the adverse environmental impacts of the project are “acceptable” if any of these benefits would be realized. The project would provide benefits as follows:

- 1. Accommodates the Need for Regional Housing.** At buildout, the Project proposes to construct approximately 326 dwelling units. As discussed in Section 3.4.14 – Population and Housing, the Project would help the City achieve its need to accommodate residential growth. The housing goal for the City of Hanford, according to its Regional Housing Needs Allocation (RHNA), includes the construction of 15,695 additional dwelling units by 2035 to accommodate estimated population growth. The Project would accommodate the need established by the RHNA, the City of Hanford General Plan Housing Element, and the projected population growth of the City of Hanford and surrounding area.
- 2. Provides Orderly Expansion and Consistent with General Plan and Zoning Ordinance.** The proposed Project provides new development in an orderly manner and is coordinated with the General Plan provision of infrastructure, public infrastructure, and public improvements. The proposed Project allows for the incremental expansion of infrastructure and public services and provides a high-quality environment for living. In addition, the proposed Project provides a safe and efficient street system that links all Project areas and allows for the movement of both vehicle and non-vehicle traffic. The Project will be required to use and expand upon the existing local road system and contribute to certain regional transportation improvements which will help to develop the transportation system in the area.

Further, the Project would fill in an undeveloped island of county land surrounded by development and will connect to the City’s existing infrastructure of roads, water, sewage and drainage. It will also create a new park in the area and connect the dead-end roads along the eastern boundary so that residents have another access to Hanford Armona Road.

- 3. Provides More Efficient Use of Land and Existing Resources.** The property was previously farmed with animal feed and fodder such as wheat, milo and corn. Permanent crops such as almonds, pistachios, vineyard and olives were no longer viable due to reduced water availability. The Project will convert the site from agricultural to an urban use. Water for continued crop

cultivation is no longer available to the property when the existing infrastructure was cut off by development of a roadway. Also, with the new Sustainable Groundwater Management Act (SGMA) laws the well water would have been inadequate and too expensive to continue farming the entire property.

This is not prime farmland being taken out of production; the proposed Project is considered a higher and better use of the property. Its proximity to State Route 198 and other existing roadways makes it a logical and efficient location for development.

4. **Will Provide Additional Economic Benefits.** Farming the site required less than two workers for the entire year. The economic benefit and revenue were marginal to the City and County. The Project will result in creating affordable housing at lower market rates, in addition to providing good paying construction jobs. Landscaping and yard maintenance costs alone will be larger than the agricultural income currently generated from the property. The construction should also increase the tax base and create more revenue for the City. Construction of 324 new homes selling at an average sales price of \$325,000, would generate an approximate \$105,300,000 value that would be taxed at 1.1 percent. This would generate over \$1,150,000 of property tax income to the City.

### **Conclusion**

As the CEQA Lead Agency for the proposed action, the City has reviewed the project description for the Project and the FEIR and fully understands the Project proposed by the applicant. Based on the entire record before the Commission, and having considered the unavoidable adverse impacts of the Project, the Commission hereby determines that all feasible mitigation has been adopted to reduce the potentially significant impacts identified in the FEIR, and that no additional feasible mitigation is available to further reduce significant impacts.

The Commission finds that economic, social, technological, and other considerations of the Project outweigh the unavoidable adverse impacts described above. Further the Commission finds that each of the separate benefits of the Project is hereby determined to be, in itself and independent of the other Project benefits, a basis for overriding all unavoidable environmental impacts identified in the FEIR and in the CEQA Findings. In making this finding, the Commission has balanced the benefits of the Project against its unavoidable environmental impacts and has indicated its willingness to accept those risks

**CITY OF HANFORD PLANNING COMMISSION  
STAFF REPORT**

**MEETING DATE:** Tuesday, January 14, 2025, continued from August 8, 2023

**PROJECT:** General Plan Amendment No. 2022-01: a request to change the general plan designation from Highway Commercial to Service Commercial and High-Density Residential on approximately 39.16 acres.

Rezone No. 2022-01: a request to change the zoning on 39.16 acres from C-H Highway Commercial to C-S Service Commercial and R-H High-Density Residential with a Planned Unit Development overlay.

Planned Unit Development No. 2022-01: a request to allow blended zoning for a master planned medical and mixed-use development, including the future construction of 15 buildings consisting of medical outpatient clinic services, a hotel and conference center, specialized education, retail, medical office, skilled nursing and assisted living, and multi-family residential uses, as well as a bio infiltration basin, associated open space, circulation and parking, and infrastructure improvements.

Mitigated Negative Declaration No. 2023-93: a request to certify that the project will have a less than significant impact with the incorporation of mitigation measures.

**LOCATION:** The project is located between 11<sup>th</sup> and 12<sup>th</sup> Avenues along Glendale Drive, north of Highway 198 (APN 011-060-007, 011-060-008, 012-290-040, 012-290-042, and 012-290-054).

**PLANNER:** Gabrielle Myers, Senior Planner

**STAFF RECOMMENDATION**

1. Recommend certification of Mitigated Negative Declaration No. 2023-93 for the project to the City Council.
2. Adopt Resolution No. 2025-04, recommending approval of General Plan Amendment No. 2022-01 to the City Council.
3. Adopt Resolution No. 2025-05, recommending approval Rezone No. 2022-01 to the City Council.
4. Adopt Resolution No. 2025-06, recommending approval of Planned Unit Development No. 2022-01 to the City Council.

**RECOMMENDED MOTION**

1. I move to recommend certification of Mitigated Negative Declaration No. 2023-93 for the project to the City Council.

2. I move to adopt Resolution No. 2025-04, recommending approval of General Plan Amendment No. 2022-01 to the City Council.
3. I move to adopt Resolution No. 2025-06, recommending approval Rezone No. 2022-01 to the City Council.
4. I move to adopt Resolution No. 2025-07, recommending approval of Planned Unit Development No. 2022-01 to the City Council.

#### CONTINUATION REQUEST

The proposed project was scheduled to be heard by the Planning Commission on August 8, 2023, however, on the day of the meeting, a comment letter was received by staff and distributed to Commissioners, (**Attachment 6**) which commented on the environmental document prepared for the project and pointed out concerns related to the initial study and the intent to adopt a mitigated negative declaration. Since the letter was received the day of the meeting, there was not adequate time to review the letter and address the concerns at the time of the public hearing. Therefore, staff and the applicant requested the Planning Commission continue the public hearing.

At the time, it was uncertain how long the letter received would take to address, so continuation to a date certain was not requested and staff noticed the new public hearing at the time it was taken off hold by the applicant and the Notice of Intent to Adopt a Mitigated Negative Declaration was recirculated for an additional 30-day review period.

#### PROJECT DESCRIPTION

The project is a request to develop Hanford Place, a medical and mixed-use development, totaling 39.16 acres. The Hanford Place Master Plan includes the future construction of 15 buildings consisting of medical outpatient clinic services, a hotel and conference center, specialized education, retail, medical office, skilled nursing and assisted living, and multi-family residential uses, as well as a bio infiltration basin, associated open space, circulation and parking, and infrastructure improvements, as shown in the Hanford Place Master Plan - **Attachment 1**.

#### Location

The project is located between 11<sup>th</sup> and 12<sup>th</sup> Avenues along Glendale Drive, north of Highway 198 (APN 011-060-007, 011-060-008, 012-290-040, 012-290-042, and 012-290-054). as shown in Figure 1.

Project Location

## General Plan Designation

The project site is designated as Highway Commercial by the General Plan, see Figure 2. According to General Plan Policy L56, the purpose of the Highway Commercial Land Use Designation is to provide areas for commercial establishments that offer accommodations, supplies, services, or recreational opportunities primarily to the traveling public. According to Policy L57, typical uses in the Highway Commercial Land Use Designation include businesses that support the recreation and tourism industry and prevent the intrusion of incompatible, non-tourist related uses which would be overly disruptive or would directly compete with shopping areas of nearby communities. Typical uses include full-service hotels, motels, eating establishments, tourist-oriented retail goods, entertainment, and services, automobile related service and repair, and car washes.

As proposed, the project is incompatible with the present land use designation, since it proposes the construction of a mixed-use medical development, which is not designed to provide services primarily to the traveling public. The project includes a request to change the land use designation from Highway Commercial to a combination of Service Commercial and High-Density Residential.

**Figure 2: General Plan Designation (outlined in bold)  
Highway Commercial**

## Zoning

The project site is zoned C-H Highway Commercial, in accordance with the General Plan Designation, Highway Commercial. See Figure 3. The project is incompatible with the present zoning, since it proposes land uses that are not permitted in the C-H Highway Commercial zone district, including medical and professional offices, urgent care clinics, a nursing college or other satellite campus, and multi-family residential. The project includes a request to change the zoning on the property from C-H Highway Commercial to a combination of C-S Service Commercial and R-H Highway Commercial.

| H1                                                                                                                                                                                                                                                        | Assisted living, skilled nursing, or hospice facility                 |                  |     |     |     | C               | C    | C    | C                           |   |     |     |             |    |    |                                                         |
| H6                                                                                                                                                                                                                                                        | Hotel or motel                                                        |                  | C   | C   | P   |                 | P    | P    |                             |   |     |     |             |    |    |                                                         |
| H7                                                                                                                                                                                                                                                        | Live/work facility                                                    |                  |     | P   |     | P               | P    | P    | P                           |   |     |     |             |    |    |                                                         |
| H8                                                                                                                                                                                                                                                        | Mobile home park                                                      |                  |     |     |     |                 |      |      |                             |   |     |     |             |    |    | 17.60.100                                               |
| H9                                                                                                                                                                                                                                                        | Multifamily dwelling, 2 units per building (duplex)                   |                  |     |     |     | P               | P    | P    | P                           |   |     |     |             |    |    |                                                         |
| H10                                                                                                                                                                                                                                                       | Multifamily dwelling, 3 or 4 units per building (triplex or fourplex) |                  |     |     |     | P               | P    | P    | C                           |   |     |     |             |    |    |                                                         |
| H11                                                                                                                                                                                                                                                       | Multifamily dwelling, 5 or more units per building                    |                  |     |     |     | P               | P    | P    |                             |   |     |     |             |    |    |                                                         |

#### Required Entitlements

As presented above, the project is inconsistent with the present land use and zoning designation. As such, the project involves a general plan amendment, rezone, and planned unit development/master plan. Future development will require site plan reviews for physical development.

#### **General Plan Amendment No. 2022-01**

A General Plan Amendment is required for the project, in order to change the General Plan designation of the subject site from Highway Commercial to a combination of Service Commercial and High-Density Residential.

#### **Rezone 2022-01**

A rezone is required for the project, in order to change the zoning from C-H Highway Commercial to a combination of C-S Service Commercial and R-H High-Density Residential with a Planned Unit Development overlay.

#### **Planned Unit Development No. 2022-01/Master Plan**

As described above, the project involves a request to allow a mixed-use medical development, spanning 39.16 acres. A planned unit development is required in order to establish project-specific design criteria, allow a blending of uses regardless of zoning, and allow cross-access, shared parking, shared landscaping, and shared lighting.

### Surrounding Uses

As referenced in the table below, the project site is surrounded by commercial uses to the south and east, vacant land to the west, and a parking lot to the north. The properties to the north and east are planned and zoned for mixed use development and the properties south and west are planned and zoned for service commercial.

| Direction | Existing Land Use                                                    | General Plan Designation                                | Zone District                                                             |
|-----------|----------------------------------------------------------------------|---------------------------------------------------------|---------------------------------------------------------------------------|
| North     | Railroad; Adventist Health Medical Center; single-family residential | Office; Office Residential                              | O Office; O-R Office Residential                                          |
| South     | CA-198; car dealership; basin; single-family residential             | Highway Commercial, Open Space, Low-Density Residential | C-H Highway Commercial, PF Public Facility, R-L-5 Low-Density Residential |

| West      | Veterinary hospital, mini-storage, California Highway Patrol, hotel  | Highway Commercial                                      | C-H Highway Commercial                                                    |

### **Access and Circulation**

Vehicular access to the site is proposed to be provided by Glendale Avenue, Fifth Street, and Campus Drive. The extension of these roadways would be constructed to City standards and would be dedicated as public right-of-way. The proposed project would also construct a roundabout, which will also be dedicated as public right-of-way and would be constructed to Caltrans or City-approved standards. As part of the project, Glendale Avenue would be realigned at the northwest corner of the Hanford Veterinary Hospital development. The existing knuckle will be removed, and Glendale Avenue will be realigned using speed-specific design curves. Any new portions of Glendale Avenue will be dedicated as public right-of-way and any portion of existing right of way not used would be abandoned. Fifth Street would be extended starting at the existing alignment before realigning to the roundabout. In addition, the proposed project proposes to provide 1,466 parking spaces throughout the project site.

## Utilities

Utilities required to serve the proposed project include water, sanitary sewer, storm water drainage, electricity, natural gas, and telecommunications infrastructure. Water service, sewage disposal, and refuse collection will be provided by the City. In addition, all City utilities (i.e., water, sewer, and storm drain) would be constructed within the proposed right-of-way. Storm drainage is proposed to be collected by an underground conveyance system and delivered to the onsite bio infiltration basin. The basin would be privately held by the owners and would collect both the proposed project and the City right-of-way. All storm drain facilities will be required to be designed to City standards.

The proposed project also proposes to convert the Peoples Ditch to a 66-inch-diameter below-ground pipeline where the ditch currently exists and would terminate approximately 20 feet short of the existing pipeline that runs under SR-198. The depth of the below-ground pipeline will be between two and six feet.

The proposed project will also require electrical, natural gas, telephone, and cable improvements. Electricity will be provided by Southern California Edison; natural gas will be provided by Southern California Gas; and telephone services will be provided by AT&T. The extent of work required for utilities and gas will be determined during final project design.

## Construction

The proposed project is proposed to be constructed in three phases. Construction is anticipated to last approximately three years. The proposed project will comply with City standards, including the City's current building code, landscape standards, and lighting standards. In addition, the proposed project would be graded similar to other developments throughout the City.

## PROJECT EVALUATION

### General Plan Amendment No. 2022-01

General Plan Amendment No. 2022-01 is a request to change the land use designation from Highway Commercial to a combination of Service Commercial and High-Density Residential, due to incompatibility with the Hanford Place Master Plan and the existing Highway Commercial land use designation.

#### 3.5.4 Highway Commercial

##### *Policy L56 Purpose of Highway Commercial Land Use Designation*

Establish the Highway Commercial land use designation to provide areas for commercial establishments that offer accommodations, supplies, services, or recreational opportunities primarily to the traveling public.

##### *Policy L57 Typical Uses in Highway Commercial Land Use Designation*

Define the uses allowed in the Highway Commercial land use designation to include businesses that support the recreation and tourism industry and to prevent the intrusion of incompatible, non-tourist related uses which would be overly disruptive or would directly compete with shopping

areas of nearby communities. Typical uses include full-service hotels, motels, eating establishments, tourist-oriented retail goods, entertainment, and services, automobile related service and repair, and car washes.

Analysis: The Hanford Place Master Plan proposes to develop a mixed-use medical complex with uses such as medical offices, clinics, psychiatric health facility, a hotel and conference center, nursing college, strip retail, a skilled nursing facility, memory care facility, assisted living, and multi-family residential. The uses proposed to be located within the Hanford Place Medical and Mixed-Use development are inconsistent with the uses typical of the Highway Commercial Land Use Development.

*Policy L58 Design of the Highway Commercial Land Use Designation*

Require that new development projects and major site reconfigurations in the Highway Commercial land use designation provide site layouts, landscaping, and screening so that the site appears aesthetically pleasing from the public street.

*Policy L59 Location and Size of Highway Commercial Land Use Designation*

Locate Highway Commercial land use designations in areas that have nearby access to Highway 198 or Highway 43.

Analysis: As proposed, the project is incompatible with the present land use designation, since it proposes the construction of a mixed-use medical development, which is not designed to provide services primarily to the traveling public. General Plan Amendment No. 2022-01 proposes to change the land use designation from Highway Commercial to a combination of Service Commercial and High-Density Residential.

**Figure 7: Existing General Plan Designation  
Highway Commercial**

**Figure 8: Proposed General Plan Designation  
Service Commercial and High-Density Residential**

### 4.5.3 Service Commercial

#### *Policy L51 Purpose of Service Commercial Land Use Designation*

Establish the Service Commercial land use designation to provide for establishments that engage in servicing equipment, materials, products and related sales and travel conveniences, but which do not require the manufacturing, assembly, packaging or processing of articles or merchandise for distribution.

#### *Policy L52 Typical Uses in Service Commercial Land Use Designation*

Define the uses allowed in the Service Commercial land use designation to include a broad range of commercial activities such as businesses which have both retail and service components. Among these are uses such as vehicle sales and service; auto rental and equipment rental; motels; restaurants (including fast food); service stations; car washes; building material supply; warehousing; wholesale trade; contractors, suppliers, small equipment yards; and other similar uses.

Analysis: The development proposed within Hanford Place does not require the manufacturing, assembly, packaging, or processing of articles of merchandise for distribution. The uses proposed are mostly medical-related. Although the Service Commercial designation is generally engaged in servicing and related sales, the designation permits a multitude of medical uses, including medical offices of any size and clinics/urgent cares, proposed within the Hanford Place development. The proposed development does not propose any use prohibited by the Service Commercial land use designation.

#### *Policy L53 Existing Service Commercial Designations*

Encourage existing service commercial centers to expand or adapt to market changes through reuse, rehabilitation, and infill development.

Analysis: The Hanford Place development does not constitute an existing Service Commercial development.

#### *Policy L54 Design of the Service Commercial Land Use Designation*

Require that new development projects and major site reconfigurations in the Service Commercial land use designation provide site layouts, landscaping, and screening so that the site appears aesthetically pleasing from the public street.

Analysis: The proposed development is designed with landscaping and screening which is aesthetically pleasing from the public street.

#### *Policy L55 Location and Size of Service Commercial Land Use Designation*

Locate Service Commercial land use designations along Highway 198 and where they can serve as a buffer land use, such as between residential areas and railroad corridors. Require new development projects to be a minimum of one acre.

Analysis: The Service Commercial land use designation will be located along Highway 198 and the Southern Pacific Railroad, as required. The Service Commercial land use designation will encompass approximately 30 acres of the development area.

### **4.4.3 High Density Residential**

The expected density range for High Density Residential is 14 to 29 units per gross acre with an expected typical density of 16 units per gross acre.

Analysis: The development proposes a 40-unit memory care facility, 40-unit assisted living facility and 90-multi-family units for a combined total of 170 residential units over approximately 10 acres (15 acres minus the five-acre storm drainage basin). The proposed density within the development is approximately 17 units per acre, which is within the prescribed density range of

the high-density residential zone district. At this time, the plan is conceptual, density will be verified during site plan review.

*Policy L38 Purpose of the High-Density Residential Land Use Designation*

Establish the High-Density Residential land use designation primarily for multi-family apartment and condominium development in proximity to Arterial streets, commercial and recreational facilities, and employment centers.

Analysis: The Hanford Place Development proposes to develop multi-family apartments and assisted living multi-family units within the plan area. The multi-family units will be proximal to employment opportunities within the Hanford Place Development, as well as the Adventist Health Hospital. The development is located 0.38 miles from the nearest arterial street, 12<sup>th</sup> Avenue.

*Policy L39 Typical Uses in the High-Density Residential Land Use Designation*

Define the uses allowed in the High-Density Residential land use designation to include multi-family residential dwellings in apartment buildings complexes.

Analysis: Multi-family residential dwellings are proposed within an apartment building complex in the development.

*Policy L40 Design of the High-Density Residential Land Use Designation*

Develop and enforce design policies and/or ordinances for High Density Residential developments that ensure high quality construction, design, open space amenities, safety and security, overall compatibility with the rest of the neighborhood.

Analysis: Development of the High-Density Residential land use within the Hanford Place Master Plan will be regulated through compliance with Section 17.14 of the Hanford Municipal Code, except where modified through development standards for the Hanford Place Master Plan.

*Policy L41 Location and Size of the High-Density Residential Land Use Designation*

Locate High Density Residential land use designations in close proximity to Arterial streets, commercial centers, recreational facilities, and employment centers.

Analysis: The High-Density Residential land use designation is proposed to be located along Glendale Avenue, between 11<sup>th</sup> and 12<sup>th</sup> Avenues, both of which are designed arterials. The designation will be located within the Hanford Place Mixed Use development, which provides employment opportunities for medical-related uses. The designation is also proximal to the Adventist Health Hospital, which is a large employment center for the City of Hanford.

The General Plan Amendment to change the land use designation from Highway Commercial to a combination of Service Commercial and High-Density Residential is consistent with the General Plan policy.

Additional Applicable Goals and Policies

**Economic Development and Employment Goals**

***Goal E1: A diverse and robust local economy capable of providing employment for all residents desiring to work in the city.***

Analysis: The proposed Hanford Place supports Goal E1 by providing medical-related employment opportunities for residents desiring to work in the City of Hanford.

***Policy P80 Health Care Services***

Support hospitals, clinics, shelters, and other medical services that meet the health care needs of Hanford's residents.

Analysis: The proposed Hanford Place development supports Policy P80 by supporting medical uses to meet the health care needs of Hanford's residents.

**Growth Management Goals**

***Goal L2: Development preference of vacant and underutilized properties.***

***Goal L3: Limitation of urban sprawl-style development patterns in new growth areas***

***Policy L11 Infill Development***

Support, encourage, and incentivize, to the extent possible, infill development projects that can effectively utilize existing transportation and utility infrastructure.

***Policy L107 Revitalization and Redevelopment***

Encourage property owners to revitalize or redevelop abandoned, obsolete, or underutilized properties to accommodate growth.

An infill development site is defined as any parcel or group of parcels that are vacant or underdeveloped and surrounded by development on at least 75% of its perimeter. Infill sites may include previously developed sites that may/will be redeveloped. Examples include:

- Mixed use development in the Downtown and/or in areas within walking distance to transit, employment centers, and commercial services where the environmental impacts of the development would be minimized.
- Targeted residential infill development that addresses the needs of seniors, lower income households, single households and empty nesters, young professionals, and other special needs groups.

***Policy L135 Infill Development Support***

Support, encourage and, to the extent possible, incentivize infill development projects that can effectively utilize existing transportation and utility infrastructure.

***Policy L137 Creative Design Solutions***

Allow unique, diverse, and creative design solutions for infill development that are compatible with and enhance surrounding land uses.

Analysis: The Hanford Place Development represents creative design solution to an in-fill development area. Development of this area gives preference to a vacant, underutilized property and limits growth to a new area. The project provides residential opportunities in proximity to existing and planned employment hubs. The project also proposes infill development that addresses the needs of seniors, such as memory care facilities and assisted living opportunities.

## Rezone No. 2022-01

Rezone No. 2022-01 is a request to change the zoning from C-H Highway Commercial to a combination of C-S Service Commercial and R-H High-Density Residential, due to incompatibility with the Hanford Place Master Plan and the existing C-H Highway Commercial zoning.

**Figure 9: Existing Zoning  
C-H Highway Commercial**

**Figure 10: Proposed Zoning  
C-S Service Commercial and R-H High-Density Residential**

The project is incompatible with the present zoning, since it proposes land uses that are not permitted in the C-H Highway Commercial zone district, including medical and professional offices, urgent care clinics, a nursing college or other satellite campus, and multi-family residential. (See Figures 4-6).

The uses proposed within the Hanford Place Master Plan are permitted in the C-S Service Commercial and R-H High-Density Residential zone district, as demonstrated in the Land Use tables, below.

**Figure 11: Zone Use Table  
Education, Religious, and Assembly Uses**

| 11                                                                                                                                                                                                                                 | Multifamily dwelling, 3 or 4 units per building (triplex or fourplex) |                                 |       | C     | P                             | P   |
| 12                                                                                                                                                                                                                                 | Multifamily dwelling, 5 or more units per building                    |                                 |       |       | P                             | P   |

Pursuant to HMC 17.06.060 Zone Changes, changes to the zoning map shall be approved by ordinance of the City Council, in accordance with Chapter 17.86. Chapter 17.86 of the Municipal Code describes the process for consideration of a Rezone. The reviewing authority is required to make the required findings below:

1. That the amendment is internally consistent with the goals, objectives, and policies of the General Plan and the Municipal Code.

Analysis: That Rezone No. 2022-01 is internally consistent with the goals, objectives, and policies of the General Plan, specifically consistent with Goals E1, L2, and L3, and Policies L38-41, L51-55, L11, L107, L135, L137 and P80 (as described in the General Plan Amendment section, above). All regulations pertaining to C-S – Service Commercial and R-H High-Density Residential zone district will be enforced as development occurs through the Site Plan Review process, except as expressly modified by the Hanford Place Development Master Plan.

2. The amendment would not be detrimental to the public health, safety, or welfare of the community.

Analysis: That this application has been reviewed by County departments, utility companies, City Fire Department, City Building Department, and other involved departments. Any mitigation required for public health and safety were applied to the proposal and required in the mitigation monitoring and reporting program.

3. The amendment would maintain the appropriate balance of land uses within the City.

Analysis: That jobs-housing balance is achieved by increasing opportunities for people to work and live in close proximity. The ratio is expressed as the number of jobs divided by the number of housing units. The jobs-housing balance is a general tool for analyzing where people work, where they live, and how effectively they can travel between the two. In the planning area, the jobs-housing balance ratio in 2013-2014 was 1.17. It is estimated that the implementation of the General Plan would increase the jobs-housing balance by 0.45 to 1.62, which would make the planning area a jobs-rich area. The proposal to change the designation from Highway Commercial to a combination of Service Commercial and High-Density Residential will impact the job-housing balance projected by increasing the number of residential units in the area. The addition of the residential units to the formerly commercial designation will not affect the City's ability to maintain an appropriate balance of land uses within the City, as the increase in housing will bring more residential units to the jobs-rich planning area.

4. The anticipated land uses on the subject site would be compatible with existing and future surrounding uses.

Analysis: That the Hanford Place Master Plan proposes the development of a medical and mixed-use development on property proposed to be zoned C-S Service Commercial and R-H High-Density Residential. The land uses within the Hanford Place development are compatible with the surrounding land uses and compatible with future surrounding lands uses.

| Direction | Existing Land Use                                                    | General Plan Designation                                | Zone District                                                             |

| West | Veterinary hospital, mini-storage, California Highway Patrol, hotel | Highway Commercial | C-H Highway Commercial |
|------|---------------------------------------------------------------------|--------------------|------------------------|

The project will be developed in conformance with the C-S Service Commercial and R-H High-Density Residential zone district regulations, except where expressly modified by the Hanford Place Master Plan (PUD).

### **Planned Unit Development No. 2023-01**

Planned Unit Development No. 2023-01 proposes the development of the Hanford Place Master Plan. The proposed Hanford Place Master Plan is attached as **Attachment 1**.

Planned Unit Development

#### **17.82.010 Purpose**

Planned unit developments (PUDs) are encouraged to achieve a more functional, aesthetically pleasing, and harmonious living and working environment within the City that otherwise might not be possible by strict adherence to the provisions of this title. In certain instances, the objectives of this title may be achieved by development that does not conform in all respects with the land use pattern designated on the zoning map or in the zone districts prescribed by this title.

#### **17.82.030 Allowed Planned Unit Developments**

A planned unit development may be utilized to achieve one (1) or more of the following objectives *(the objectives sought by this PUD application are denoted by a check mark)*

- ✓ A. To permit a site within more than one (1) zone district to mix the permitted or conditionally permitted land uses of both zones within the site without regard to the zone district boundary.
- B. To permit development intensity greater than would otherwise be permitted by the implementation of the standards of the zone district in which the site is located.
- ✓ C. To permit the lot patterns on size, shape, and layout that would otherwise not be permitted by the standards of the zone district in which the site is located.
- ✓ D. To modify the required building setbacks, distances between structures, and landscaped areas that would otherwise be required by this title.
- E. To permit variations to the standard local street cross-sections.
- F. To permit private streets and gated neighborhoods.
- G. To permit the implementation of the mixed-use provisions in the MX-N, MX-C, or MX-D zone districts; and
- ✓ To reduce the amount of required parking spaces when spaces are shared among multiple land uses.

#### **17.82.040 Prohibited Planned Unit Developments**

A planned unit development is prohibited from being used to achieve one (1) or more of the following:

- A. To add land uses that are not otherwise permitted in the zone district in which the PUD is located.

Analysis: With the proposal to change the land use designation and zoning from C-H Highway Commercial to C-S Service Commercial and R-H High-Density Residential, the Master Plan does not propose to add land uses that are not otherwise permitted in the zone district in which the PUD will be located. All uses proposed are consistent with the uses permitted in the C-S Service Commercial and R-H High-Density Residential land use.

- B. To increase residential densities beyond the maximum allowed by the General Plan.

Analysis: The residential densities proposed within the Hanford Place Master Plan are consistent with the allowable density in the High-Density Residential land use designation, which is the land use sought through General Plan Amendment No. 2022-01.

- C. To modify sign standards or provisions in Chapter 17.56; or

Analysis: The applicant proposes to develop a Sign Program, consistent with the standards set forth in 17.56.220.

- D. To modify parking and loading standards or provisions in Chapter 17.54, except as stated in Section 17.82.030.

Analysis: Parking is proposed as follows within the Hanford Place Master Plan:

- a. motel or hotel - 1 space per guest room plus 1 space per employee.
- b. assisted living, skilled nursing facility, or hospice - 1 space for every 4 beds.
- c. multifamily dwellings - at least 50% of spaces shall be covered.
  - i. one-bedroom - 1.5 spaces per dwelling unit
  - ii. two-bedroom - 1.75 spaces per dwelling unit
  - iii. three or more bedrooms - 2 spaces per dwelling unit
- d. all other allowed uses - 1 space per 350 square feet of building space.

The Hanford Place Master Plan does not seek to allow any of the specified prohibited objectives.

#### **17.82.050 Site Area**

- A. The minimum site area for a planned unit development shall be five (5) acres, except that there shall be no minimum site area requirements if the site is an infill development site.
- B. The site area may be made up of more than one (1) parcel, however all parcels in the site area shall be contiguous.

Analysis: The Hanford Place Master Plan encompasses 39.16 acres.

#### **17.82.060 Findings**

- A. Before a planned unit development (PUD) permit can be approved, all of the following findings shall be made by the reviewing authority identified in Chapter 17.70:
1. The location and design of the PUD is in accordance with the purpose of this title.
  2. The PUD is being proposed to achieve one (1) or more of the objectives identified in Section 17.82.030.
  3. The location and design of the PUD and the conditions under which it would be operated or maintained will not be detrimental to the public health, safety or welfare of the community to properties or improvements in the vicinity.
  4. The location and design of the PUD will not generate more traffic than the streets in the vicinity can carry without congestion and will not overload utilities.
  5. That PUD's population density, site area and dimensions, site coverage, yard spaces, height of structures, distances between structures, off-street parking and off-street loading facilities, landscaped areas and street design will produce an environment of stable and desirable character consistent with the purpose of this title.
  6. The combination of different dwelling types, architectural appearance, and/or varieties of land uses in the development will complement each other and will harmonize with the existing and proposed land uses in the vicinity; and
- B. A PUD may be denied if the reviewing authority finds one (1) or more of the findings in this section cannot be made.

Analysis: The required findings are able to be supported, as demonstrated in the Findings of Approval section.

Conformance with the standards of the C-S – Service Commercial and R-H High-Density Residential Zone Districts

**17.20.030 Service Commercial Site Area**

In the C-S – Service Commercial zone district, the minimum site area shall be 5,000 square feet.

**17.14.030 High-Density Residential Lot Area**

In the R-H High-Density Residential zone district, the minimum lot area shall be 5,000 square feet, however existing lots of less than 5,000 square feet may be developed in accordance with the specifications of Section 17.14.

**Analysis:** The project site encompasses a total of 39.16 acres. The C-S Service Commercial portion of the development is 25.9 acres. The R-H High-Density Residential portion of the development is approximately 10 acres. *The remaining acreage represents right-of-way dedication.*

**17.20.040 Service Commercial Lot Dimensions**

In the C-S – Service Commercial zone district, the minimum lot frontage shall be forty (40) feet, unless a reciprocal use agreement for shared common access and parking areas is recorded with the Kings County recorder's office.

#### 17.14.040 High-Density Residential Lot Dimensions

In the R-H High-Density Residential zone district:

- A. The minimum lot frontage shall be forty (40) feet.
- B. The minimum lot width shall be fifty (50) feet for interior lots and sixty (60) feet for corner lots.
- C. The minimum lot depth shall be ninety (90) feet.
- D. Lots developed adjacent to an arterial or collector street are to be designed as walled or fenced back-on or side-on lots with a minimum five (5) and maximum ten (10) foot wide landscape easement continuous and adjacent to the street right-of-way line. The minimum lot dimensions are to be exclusive of the landscape easement area. The wall or fence shall be located in the landscape easement area adjacent to the easement line.

**Analysis:** The entire project site is formed by four parcels. Each parcel will have street frontage when Glendale Avenue and Campus Drive are extended, as shown below.

The Hanford Place Master Plan shows future pad development; however, parcel division is not proposed at this time. Future division will be evaluated through the Tentative Parcel Map process, subject to Planning Commission review.

#### 17.14.050 High-Density Residential Site Area Per Dwelling Unit

In the R-H High-Density Residential zone district, the minimum site area per dwelling unit shall be fifteen hundred (1,500) square feet. 170 multi-family units are proposed throughout the Hanford Place Master Planned Development. The 170 units are a combination of multi-family units, assisted living units, and a memory care facility. The entire Hanford Place Master Plan encompasses 39.16 acres (1,705,810 square feet). The number of units proposed does not exceed the square footage required per unit.

The Hanford Place Master Plan is conceptual. Future development of residential units will be evaluated to ensure the number of units per site area does not exceed the prescribed requirement.

#### **17.20.050 Service Commercial Coverage**

In the C-S – Service Commercial zone district, the maximum coverage of a lot shall be determined by the combined building setback area requirements, open space requirements, and off-street parking and loading requirements.

#### **17.14.060 High-Density Residential Coverage**

In the R-H High-Density Residential zone district, the maximum coverage of a lot shall be determined by the combined building setback area requirements, accessory structure limitations, open space requirements, and off-street parking requirements.

All required building setbacks, landscaping, off-street parking and loading requirements will be evaluated and mandated as part of the site plan review process, upon physical development.

#### **17.20.060 Service Commercial Building Setback Areas**

In the C-S – Service Commercial zone district, no structure shall be placed within a building setback area.

Front:

The front building setback area shall be a minimum of 15 feet, except that in C-S zones bounded by State Route 198, 10th Avenue, 11th Avenue, and Sixth Street there is no minimum front building setback area requirement. The project site is bounded by State Route 198 to the south.

Rear:

The rear building setback may be zero (0) feet from the rear lot line, except where the rear lot line abuts a public street in an R-L, R-M, R-H, OR, O, PF, AP, or CO zone district then the rear building setback shall be fifteen (15) feet.

Side:

The side building setback area shall be zero (0) feet, except that where the side lot line abuts a public street or an R-L, R-M, R-H, OR, O, PF, AP, or CO zone districts the side building setback area shall be 15 feet.

#### **17.14.070 High-Density Residential Building Setback Areas**

In the R-H High-Density Residential zone district, no structure shall be placed within a building setback area.

Front:

The front building setback area shall be fifteen (15) feet from the front lot line for livable building space and twenty (20) feet for garages, carports, and other non-livable building space.

Rear:

The rear building setback shall be fifteen (15) feet from the rear lot line, except where there is a landscape easement with a wall or fence on the rear of the lot then the rear building setback shall be twenty (20) feet. The rear building setback area shall be increased by ten (10) feet for buildings over one story high.

Side:

The side building setback area shall be five (5) feet from an interior side lot line and ten (10) feet from a street side property line. Where there is a landscape easement with a wall or fence on the street side of the lot the side yard setback area shall be measured from the easement area instead of the side lot line.

**Analysis:** As part of the Hanford Place Master Plan, project-specific setbacks have been identified in the Design Conditions (p. 5 of the Master Plan), as follows:

- Additional building setbacks are not required between the two zones within the PUD plan area. The C-S zone required setbacks shall apply to the entire PUD plan area.

The conceptual site plan shown in the Hanford Place Master Plan shows buildings setback approximately 77 feet from the northern most property boundary, 65 feet from the western property boundary, and a minimum of 34 feet from the southern property boundary.

The following setbacks will be enforced during Site Plan Review for the Hanford Place Master Plan

| Direction           | Setback (measured in feet)                                  |
|---------------------|-------------------------------------------------------------|
| Front Setback       | 15 feet; No minimum for lots bounded by State Route 198 (0) |
| Rear Setback        | No minimum required (0)                                     |
| Side Setback        | No minimum required (0)                                     |
| Street-Side Setback | 15 feet                                                     |

#### 17.20.070 Service Commercial Distances Between Structures

In the C-S – Service Commercial zone district, the minimum distance between a structure used solely for residential purposes and another structure shall be 10 feet, except as provided by the building code.

#### **17.14.080 High-Density Residential Distances Between Structures**

In the R-H High-Density Residential zone district, the minimum distance between structures shall be ten (10) feet, except as provided by the building code.

**Analysis:** As required, the minimum distance between structures within the Hanford Place Master Plan will be 10 feet, except as provided by building code.

#### **17.20.080 Service Commercial Height of Structures**

In the C-S – Service Commercial zone district, the maximum structure height shall be 50 feet.

#### **17.14.090 High-Density Residential Height of Structures.**

The maximum structure height shall be thirty-five (35) feet.

**Analysis:** As part of the Hanford Place Master Plan, project-specific height limitations have been identified in the Design Conditions (p. 5 of the Master Plan), as follows:

- The maximum building height for the PUD area shall be per the C-S zone, which is 50 feet.

The requested height is able to be supported. There is no conflict with the height proposed and the Airport Land Use Compatibility Plan, as the project area is located outside of the Airport Protection Zone.

#### **17.20.090 Service Commercial Driveways**

In the C-S – Service Commercial zone district, wherever possible developments shall share driveways to minimize the number of driveways on public streets. New driveways near street corners shall be located a minimum 100 feet from the radius curve of the curb, unless otherwise specifically approved by the City Engineer. Sites with alleys should utilize alley access to minimize driveways on streets to the greatest extent possible.

#### **17.14.100 High-Density Residential Driveways**

In the R-H High-Density Residential zone district, the width of a driveway and any paved area shall not cumulatively exceed forty percent (40%) of the width of the lot's street frontage on which the driveway and any paved area faces. In the case of "L" or "U" shaped driveways or other configurations besides perpendicular driveways the paved area of these driveways shall not exceed fifty percent (50%) of the front building setback area. On corner lots, the driveway shall be located on the side of the lot adjacent to the interior lot line. On key lots the driveway shall be located on the side of the lot which is not adjacent to the rear lot line of the adjacent reverse corner lot.

**Analysis:** The Hanford Place Master Plan proposes to develop shared driveways and establish cross-access throughout the Master Planned development. Access will be generally located as shown in red, below:

The location of driveways will be proposed and reviewed by the City Engineer and Fire Department during Site Plan Review when physical, site-specific development is proposed.

#### 17.20.100 Service Commercial Off-Street Parking

Off-street parking and off-street loading facilities shall be provided on the site for each use as prescribed in Chapter 17.54. In the C-S Service Commercial zone district, parking areas shall not be closer than five (5) feet to any front or street side lot line. The area between the lot line and parking area shall be landscaped. New parking areas should be located behind or to the side of buildings, not between buildings and the street.

#### 17.14.130 High-Density Residential Off-Street Parking

In the R-H High-Density Residential zone district, off-street parking and off-street loading facilities shall be provided on the site for each use as prescribed in Chapter 17.54, and as follows:

- A. Required parking spaces may not be provided in any front, side, or rear building setback area.
- B. The minimum parking space dimensions shall be nine (9) feet wide by eighteen and one-half (18.5) feet long.
- C. No recreation vehicle, including without limitation camping trailer, boat trailer, utility trailer, boat, pickup camper, motor home, dune buggy, or similar vehicle/trailer shall be stored or parked, except within an enclosed side or rear yard or within a garage or carport except if a side or rear yard is not accessible due to existing legal permanent structures, a recreational vehicle or trailer may be parked in a driveway or adjacent to a driveway if it does not create a nuisance or safety problem as determined by the Community Development Director.
- D. All recreational vehicles or trailers parked in a location visible from the street are to be clean and maintained so as not to detract from the neighborhood. Also, see Chapter 10.76 of the Hanford Municipal Code.

- E. No recreational vehicle or trailer shall be used as a residence.
- F. All motor vehicles incapable of movement under their own power, other than in cases of emergency, shall be stored in an entirely enclosed space, garage, or carport. Vehicles with custom fitted covers may be stored in an open area when it does not create a nuisance or safety problem as determined by the Community Development Director, cause complaints from neighbors or violate any section of this code.
- G. Repair of vehicles owned by the resident of the property and storage of parts shall be within an enclosed garage or carport, if no garage exists. Repair of vehicles not owned by the resident of the property is prohibited. Vehicle repair and storage of parts are prohibited in a driveway and the front or street side building setback areas.
- H. Garages and carports are to be primarily used for the parking of four-wheeled vehicles. The use of garages or carports for general storage, recreation activities or other uses that prevent the use of the garage or carport for the parking of at least one four-wheeled vehicle is prohibited.
- I. Except for driveways allowed in the front building setback area, all additional parking for residential uses shall be to the rear or side of the dwelling. No parking shall occur in the front or street side building setback areas.

Analysis: The Hanford Place Master Plan proposes parking to adhere to the following prescribed ratios:

- a. motel or hotel - 1 space per guest room plus 1 space per employee.
- b. assisted living, skilled nursing facility, or hospice - 1 space for every 4 beds.
- c. multifamily dwellings - at least 50% of spaces shall be covered.
  - i. one-bedroom - 1.5 spaces per dwelling unit
  - ii. two-bedroom - 1.75 spaces per dwelling unit
  - iii. three or more bedrooms - 2 spaces per dwelling unit
- d. all other allowed uses - 1 space per 350 square feet of building space.

Parking will be required to be located outside of any required setback area, at a minimum of five feet from any front or street-side lot line. Although the C-S Service Commercial zone district specifies that parking shall not be located between buildings and the street, this is not required within the Hanford Place Master Plan. A deviation will be allowed through the Planned Unit Development process.

Parking will be further evaluated during the site plan review process to ensure compliance with the requirements set forth.

#### **17.20.110 Service Commercial Usable Open Space**

There is no minimum requirement for usable open space in the C-S – Service Commercial zone district.

#### **17.14.140 High-Density Residential Usable Open Space**

In the R-H High-Density Residential zone district, lots with four (4) or less dwelling units shall provide for a usable open space area of a minimum three hundred (300) square feet per dwelling unit. The open space shall be a minimum fifteen (15) feet wide. Lots with five (5) or more dwelling units shall provide for a usable open space area equal to five percent (5%) of the lot area. Where multiple lots that together make up a single development site, the required open space may be combined into common open space areas that are accessible to all residents of the site.

**Analysis:** Per the conceptual site plan provided within the Master Plan, a swimming pool is proposed to serve as the common open space in the multi-family development. Swimming pools are permitted as common open space, as described in Section 17.98.020 Definition of Terms.

“Open space, common usable” means recreational or leisure space for the shared use of residents of a multi-unit development with no dimension less than twenty (20) feet and may include gardens, playgrounds, courtyards, swimming pools, sitting areas, court games, recreation rooms, exercise rooms or gyms, spas, community rooms, lawn/turf used for open play, ponds, fountains, atriums, picnic areas, rooftop gardens or green roofs, or similar uses or facilities.

Open space will be required to be provided in an area equivalent to five percent of the total site area associated with the multi-family use. Open space is not required to be provided within the C-S Service Commercial portion of the plan.

#### **17.14.110 High-Density Residential Accessory Structures**

In accordance with the R-H High-Density Residential zone district standards, accessory structures may be located with a required rear or side building setback area subject to all of the following:

- A. The floor area shall be a maximum one hundred twenty (120) square feet.
- B. The walls shall be at least three (3) feet from rear and side lot lines.
- C. The roof eaves shall be at least two (2) feet from rear and side lot lines.
- D. The accessory structure shall be separated from other structures by a minimum of ten (10) feet.
- E. The plate line height shall be a maximum seven (7) feet high.
- F. The roof pitch shall be a maximum 4:12.
- G. The roof ridge peak height shall be a maximum of ten (10) feet.

**Analysis:** Accessory structures are not proposed at this time; future proposal of accessory structures will be required to adhere to the above standards within the R-H High-Density Residential portion of the plan.

#### **17.14.120 High-Density Residential Other Setback Standards**

The following setback standards shall apply to mechanical equipment, garages and carports, swimming pools, decks, balconies, and other types of platforms.

- A. Mechanical equipment shall be located a minimum of five (5) feet from a side lot line that adjoins a neighboring side lot line.
- B. Garages or carports opening onto an alley shall be set back twenty-five (25) feet from the far side of the alley, provided that the structure, including roof overhang, shall not extend into the alley right-of-way. (No alleys proposed within the development)
- C. Above or below ground swimming pools shall be set back five (5) feet from all lot lines.
- D. Decks, balconies, and other types of platforms with a floor height over two (2) feet high shall be set back five (5) feet from the rear and interior side lot lines and ten (10) feet from the street side lot line.
- E. Garages and carports opening on the street side lot line of a corner lot shall be set back twenty (20) feet from the street side lot line. (Ord. 17-04, 2017)

**Analysis:** Mechanical equipment, garages and carports, swimming pools, decks, balconies and other platforms will be evaluated and required to adhere to the above standards within the R-H High-Density Residential portion of the Master Plan area.

#### **17.20.120 Service Commercial Landscaping**

In the C-S – Service Commercial zone district, landscaping shall be provided and permanently maintained in a setback area not less than 15 feet from a lot line adjoining a street, except where the setback area is covered by structures, parking, or driveways.

#### **17.14.150 High-Density Residential Landscaping**

In the R-H High-Density Residential zone district, except for driveways and approved parking areas all yard areas and setback areas visible from the street(s) shall be landscaped with live plant materials and ornamentation common to the Hanford Area or up to 100 percent of the yard and setback area may be landscaped with artificial turf and other permeable surfaces.

**Analysis:** The conceptual site plan within the Master Plan shows landscape areas within all areas not used for parking, structures, or driveways and specifies that landscaping design shall be consistent between the sites in the PUD plan area. As required, during the site plan review process, the Site Plan Review Committee will require all areas not covered by structures, parking, or driveway shall be landscaped with live plant material, artificial turf, or other permeable surfaces, consistent with State law.

#### **17.20.130 Service Commercial Screening, Fences, and Walls**

In the C-S – Service Commercial zone district, a block wall with a minimum height of seven (7) feet shall be provided along any side or rear lot line that abuts an R-L, R-M, R-H, OR, PF, AP, or CO zone district. No fence or wall shall be placed in front of or within any landscaped area located next to a street.

#### **17.14.160 High-Density Residential Screening, Fences, and Walls**

In the R-H High-Density Residential zone district, all fences and walls shall be provided on the site for each use in accordance with Section 17.50.120, which requires:

Fences and walls in the R-L, R-M, R-H, OR O and PF zone districts shall be constructed or installed in accordance with the following:

- A. Along a rear lot line not exceeding seven (7) feet in height.
- B. Along an interior side lot line not exceeding seven (7) feet in height beginning at ten (10) feet from the front lot line.
- C. On a corner lot along the street side lot line not exceeding seven (7) feet in height beginning at twenty-five (25) feet from the front lot line. On a reverse corner lot, the fence or wall is to be set back from the street side lot line five (5) feet. On a reverse corner lot, the rear lot line fence is not to extend beyond the five (5) foot street side building setback area.
- D. On a corner lot when a residence is constructed with its front access facing the street side lot line of a corner lot, a six (6) foot high fence is to be placed ten (10) feet behind the front property line. The street corner forty-five (45) degree angle line of sight is to be maintained as described in subsection H of this section. When the front of the house fronts the street side lot line a fence exceeding three (3) or four (4) feet in height as described in subsections E and F of this section is to be set back ten (10) feet from the street side lot line.
- E. Along a front lot line not exceeding three (3) feet in height.
- F. Along a front lot line not exceeding four (4) feet in height when the upper one (1) foot is fifty percent (50%) or more open.
- G. Along a front lot line an open chain link fence up to seven (7) feet in height may be located in conjunction with a public or quasi-public playground or park use.
- H. A six (6) foot fence or wall may be located in a front building setback area when set back ten (10) feet from the front lot line. Except in the case of a corner lot, the fence wall shall begin a forty-five (45) degree angle at a point twenty-five (25) feet from the front lot line located on the street side lot line.

**Analysis:** As identified in the initial study, six-and-a-half foot-high sound walls would mitigate noise impacts for outdoor uses, such as the swimming pools within the hotel and multi-family units. Aside from the sound walls proposed to reduce noise impacts, fencing and walls are not proposed within the Hanford Place Master Plan.

As part of the Hanford Place Master Plan, project-specific fencing and walls have been identified in the Design Conditions (p. 5 of the Master Plan), as follows:

- A block wall is not required within the PUD plan area between the zones.

Requests for placement of walls will be reviewed and required as part of the Site Plan Review process.

#### **17.20.140 Service Commercial Signs**

Signs placed in the C-S – Service Commercial zone district shall be subject to the requirements and standards prescribed in Chapter 17.56.

#### **17.14.170 High-Density Residential Signs**

Signs placed in the R-H High-Density Residential zone district shall be subject to the requirements and standards prescribed in Chapter 17.56.

**Analysis:** No signage is proposed at this time. The applicant proposes the development of a Master Sign Program for the Hanford Place Master Plan area, as described in the Design Conditions (p. 5 of the Master Plan):

- A sign program shall be established prior to building permit approval for the first office or commercial use. The sign program would not apply to residential, and hotel/motel uses, which would follow sign standards in the Zoning Ordinance.

Establishment of a sign program for a project requiring Planning Commission review, requires approval by the Planning Commission, as described in Section 17.56.220 of the Hanford Municipal Code:

#### **17.56.220 Master Sign Program**

- A. The purpose of the master sign program provisions is to provide a coordinated and flexible design approach to signage for Hanford's commercial shopping districts and office parks. A master sign program is required for any site that contains more than three (3) commercial establishments.
- B. A master sign program shall be reviewed by the Community Development Director as an administrative use permit. The Planning Commission shall approve a master sign program when it is proposed with a development project that requires a conditional use permit.
- C. A master sign program shall not be used to grant of a special privilege nor provide more visibility or exposure than is available to similarly situated properties.
- D. Master sign programs shall feature a unified and coordinated approach to the materials, color, size, type, placement and general design of signs proposed for a project or property.
- E. Reasonable conditions of approval may be imposed to achieve the purposes of this section and ensure internal sign design consistency on the site.
- F. After approval of a master sign program, no sign shall be erected, placed, painted, or maintained, except in conformance with such program, and such program shall be enforced in the same way as any provision in this section.
- G. The master sign program and all conditions of approval shall be attached to the lease agreements for all leasable space subject to the master sign program.

- H. Approval of a master sign program does not waive the permit requirements for individual signs that are subject to the program.
- I. The Community Development Director may approve minor amendments to a master sign program that are in substantial conformance with the original approval. All other amendments, including amendments to conditions of approval, shall be processed as a new application. Proposed amendments shall include written concurrence by the property owner.

The Master Sign Program will apply to all uses in the C-S Service Commercial portion of the plan, except for the hotel.

The hotel will be subject to the following sign standards, established by the Municipal Code for the C-S Service Commercial zone district.

**Table [17.56.090\(A\)](#)**

| <b>Number and Size of Permanent Signs by Zone</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Zone District</b>                              | <b>Building Signs</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>Freestanding Signs</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| C-N, C-R, C-S, C-H, MX-N, MX-C, and O zones       | <p>No limit to number of signs per business establishment. Allowed square footage per building frontage is cumulative.</p> <p>Establishments with primary building frontage less than 300 feet: 2 sq. ft. per 1 lineal foot up to a maximum 350 sq. ft. along primary frontage. 50 sq. ft. allowed regardless of frontage length.</p> <p>Secondary building frontage: 1 sq. ft. per lineal foot up to a maximum 200 sq. ft. per secondary frontage. 35 sq. ft. allowed regardless of frontage length.</p> <p>Sites within 100 feet of State Route 198 may count the frontage facing State Route 198 as their primary frontage for the purpose of calculating maximum sign size.</p> | <p>1 sign per establishment maximum.</p> <p>40 sq. ft. maximum sign face size.</p> <p>6 feet high maximum if set back 10 feet from property line.</p> <p>5 feet high maximum if set back 5 feet from property line.</p> <p>4 feet high maximum if set back 0 feet from property line.</p> <p>Sites with an integrated shopping center: 1 additional freestanding sign up to 350 sq. ft. Maximum height not greater than 1.5 times the average height of the building.</p> |

The uses proposed within the R-H High-Density Residential portion of the plan will be subject to the following sign standards, established by the Municipal Code:

Table [17.56.090\(A\)](#)

| Number and Size of Permanent Signs by Zone                                                     |                                                                                                                                                       |                                                                                                             |
|------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| Zone District                                                                                  | Building Signs                                                                                                                                        | Freestanding Signs                                                                                          |
| AP, R-L, R-M, and R-H zones with 4 or less residences per site                                 | 1 sign per residence maximum.<br>4 sq. ft. maximum size per sign.<br>Placement a maximum 8 feet high.<br>External illumination only.                  | None allowed.                                                                                               |
| AP, R-M, and R-H zones with 5 or more residences per site or with non-residential uses on site | 1 sign per street frontage maximum.<br>30 sq. ft. maximum size per sign.<br>Placement a minimum 5 feet below roofline.<br>External illumination only. | 1 sign per site maximum.<br>20 sq. ft. maximum size.<br>6 feet high maximum.<br>External illumination only. |

#### 17.20.150 Service Commercial General Provisions and Standards

No business, service, or processes that is not a part of the main use of the site shall be conducted outside a completely enclosed permanently fixed structure, except where specifically permitted by this title. Mechanical equipment shall be located a minimum of five (5) feet from a rear or side lot line that abuts an R-L, R-M, R-H, OR, O, PF, AP, or CO zone district.

#### 17.14.180 High-Density Residential General Provisions and Standards

In accordance with the R-H High-Density Residential zone district standards, structures and the use of structures or land shall be subject to the requirements and standards prescribed in Chapter 17.50.

**Analysis:** The Hanford Place Development will be developed consistent with the General Provisions set forth for the C-S Service Commercial and R-H High-Density Residential zone district.

### FINDINGS FOR APPROVAL

#### General Plan Amendment No. 2022-01

In accordance with HMC Section 17.88.040, before a general plan amendment may be approved, all of the following findings shall be made by the reviewing authority:

1. That the amendment is internally consistent with the goals, objectives, and policies of the General Plan and the Municipal Code.

Analysis: That Rezone No. 2022-01 is internally consistent with the goals, objectives, and policies of the General Plan, specifically consistent with Goals E1, L2, and L3, and Policies

L38-41, L51-55, L11, L107, L135, L137 and P80 (as described in the General Plan Amendment section, above). All regulations pertaining to C-S – Service Commercial and R-H High-Density Residential zone district will be enforced as development occurs through the Site Plan Review process, except as expressly modified by the Hanford Place Development Master Plan.

2. The amendment would not be detrimental to the public health, safety, or welfare of the community.

Analysis: That this application has been reviewed by County departments, utility companies, City Fire Department, City Building Department, and other involved departments. Any mitigation required for public health and safety were applied to the proposal and required in the mitigation monitoring and reporting program.

3. The amendment would maintain the appropriate balance of land uses within the City;

Analysis: That jobs-housing balance is achieved by increasing opportunities for people to work and live in close proximity. The ratio is expressed as the number of jobs divided by the number of housing units. The jobs-housing balance is a general tool for analyzing where people work, where they live, and how effectively they can travel between the two. In the planning area, the jobs-housing balance ratio in 2013-2014 was 1.17. It is estimated that the implementation of the General Plan would increase the jobs-housing balance by 0.45 to 1.62, which would make the planning area a jobs-rich area. The proposal to change the designation from Highway Commercial to a combination of Service Commercial and High-Density Residential will impact the job-housing balance projected by increasing the number of residential units in the area. The addition of the residential units to the formerly commercial designation will not affect the City's ability to maintain an appropriate balance of land uses within the City, as the increase in housing will bring more residential units to the jobs-rich planning area.

4. The anticipated land uses on the subject site would be compatible with existing and future surrounding uses.

Analysis: That the Hanford Place Master Plan proposes the development of a medical and mixed-use development on property proposed to be zoned C-S Service Commercial and R-H High-Density Residential. The land uses within the Hanford Place development are compatible with the surrounding land uses and compatible with future surrounding lands uses.

| Direction | Existing Land Use                                                    | General Plan Designation                                | Zone District                                                             |
|-----------|----------------------------------------------------------------------|---------------------------------------------------------|---------------------------------------------------------------------------|
| North     | Railroad; Adventist Health Medical Center; single-family residential | Office; Office Residential                              | O Office; O-R Office Residential                                          |
| South     | CA-198; car dealership; basin; single-family residential             | Highway Commercial, Open Space, Low-Density Residential | C-H Highway Commercial, PF Public Facility, R-L-5 Low-Density Residential |
| East      | Integrate shopping center – grocery, retail, gym, restaurant         | Regional Commercial                                     | C-R Regional Commercial                                                   |

|      |                                                                     |                    |                        |
|------|---------------------------------------------------------------------|--------------------|------------------------|
| West | Veterinary hospital, mini-storage, California Highway Patrol, hotel | Highway Commercial | C-H Highway Commercial |
|------|---------------------------------------------------------------------|--------------------|------------------------|

The project will be developed in conformance with the C-S Service Commercial and R-H High-Density Residential zone district regulations, except where expressly modified by the Hanford Place Master Plan (PUD).

### **Rezone No. 2022-01**

In accordance with HMC Section 17.86.030, before a zone change may be approved, all of the following findings shall be made by the reviewing authority: *(Note: the required findings to support the rezone application are the same as the findings used to support the General Plan Amendment).*

1. That the amendment is internally consistent with the goals, objectives, and policies of the General Plan and the Municipal Code.

Analysis: That Rezone No. 2022-01 is internally consistent with the goals, objectives, and policies of the General Plan, specifically consistent with Goals E1, L2, and L3, and Policies L38-41, L51-55, L11, L107, L135, L137 and P80. All regulations pertaining to C-S – Service Commercial and R-H High-Density Residential zone district will be enforced as development occurs through the Site Plan Review process, except as expressly modified by the Hanford Place Development Master Plan.

2. The amendment would not be detrimental to the public health, safety, or welfare of the community.

Analysis: That this application has been reviewed by County departments, utility companies, City Fire Department, City Building Department, and other involved departments. Any mitigation required for public health and safety were applied to the proposal and required in the mitigation monitoring and reporting program.

3. The amendment would maintain the appropriate balance of land uses within the City;

Analysis: That jobs-housing balance is achieved by increasing opportunities for people to work and live in close proximity. The ratio is expressed as the number of jobs divided by the number of housing units. The jobs-housing balance is a general tool for analyzing where people work, where they live, and how effectively they can travel between the two. In the planning area, the jobs-housing balance ratio in 2013-2014 was 1.17. It is estimated that the implementation of the General Plan would increase the jobs-housing balance by 0.45 to 1.62, which would make the planning area a jobs-rich area. The proposal to change the designation from Highway Commercial to a combination of Service Commercial and High-Density Residential will impact the job-housing balance projected by increasing the number of residential units in the area. The addition of the residential units to the formerly commercial designation will not affect the City's ability to maintain an appropriate balance of land uses within the city, as the increase in housing will bring more residential units to the jobs-rich planning area.

4. The anticipated land uses on the subject site would be compatible with existing and future surrounding uses.

**Analysis:** That the Hanford Place Master Plan proposes the development of a medical and mixed-use development on property proposed to be zoned C-S Service Commercial and R-H High-Density Residential. The land uses within the Hanford Place development are compatible with the surrounding land uses and compatible with future surrounding lands uses.

| Direction | Existing Land Use                                                    | General Plan Designation                                | Zone District                                                             |
|-----------|----------------------------------------------------------------------|---------------------------------------------------------|---------------------------------------------------------------------------|
| North     | Railroad; Adventist Health Medical Center; single-family residential | Office; Office Residential                              | O Office; O-R Office Residential                                          |
| South     | CA-198; car dealership; basin; single-family residential             | Highway Commercial, Open Space, Low-Density Residential | C-H Highway Commercial, PF Public Facility, R-L-5 Low-Density Residential |
| East      | Integrate shopping center – grocery, retail, gym, restaurant         | Regional Commercial                                     | C-R Regional Commercial                                                   |
| West      | Veterinary hospital, mini-storage, California Highway Patrol, hotel  | Highway Commercial                                      | C-H Highway Commercial                                                    |

The project will be developed in conformance with the C-S Service Commercial and R-H High-Density Residential zone district regulations, except where expressly modified by the Hanford Place Master Plan (PUD).

#### **Planned Unit Development No. 2022-01 (Hanford Place Master Plan)**

Pursuant to Section 17.82.060 of the Hanford Municipal Code, six findings must be made before approval of the planned unit development application:

1. That the location and design of the planned unit development is in accordance with the purpose of this title.

**Analysis:** Location - That in accordance with Section 17.82.050 of the Hanford Municipal Code, a planned unit development shall be a minimum five-acre site area, except that there shall be no minimum site area requirements if the site is an infill development site. The planned unit development pertains to a 39.16-acre development, which exceeds the minimum site area for a planned unit development.

Design and Purpose - That planned unit developments are encouraged to achieve a more functional, aesthetically pleasing, and harmonious living and working environment within the City, that otherwise might not be possible by strict adherence to the provisions of the municipal code. In certain instances, the objectives of the municipal code may be achieved by development that does not conform in all respects with the land use pattern designated on the zoning map or in the zone district prescribed. The planned unit development seeks to:

- ✓ A. To permit a site within more than one (1) zone district to mix the permitted or conditionally permitted land uses of both zones within the site without regard to the zone district boundary.

- ✓ C. To permit the lot patterns on size, shape, and layout that would otherwise not be permitted by the standards of the zone district in which the site is located.
- ✓ D. To modify the required building setbacks, distances between structures, and landscaped areas that would otherwise be required by this title.
- ✓ E. To reduce the amount of required parking spaces when spaces are shared among multiple land uses.

The design of Planned Unit Development No. 2022-01 is consistent with the objectives of Section 17.82.

2. That the planned unit development is being proposed to achieve one or more of the objectives identified in Section 17.82.030.

**Analysis:** That the planned unit development is requested, in order to achieve the following objectives identified in Section 17.82.030:

- ✓ A. To permit a site within more than one (1) zone district to mix the permitted or conditionally permitted land uses of both zones within the site without regard to the zone district boundary.
- ✓ C. To permit the lot patterns on size, shape, and layout that would otherwise not be permitted by the standards of the zone district in which the site is located.
- ✓ D. To modify the required building setbacks, distances between structures, and landscaped areas that would otherwise be required by this title.
- ✓ E. To reduce the amount of required parking spaces when spaces are shared among multiple land uses.

The design of Planned Unit Development No. 2022-01 is consistent with the objectives of Section 17.82.

3. That the location and design of the planned unit development and the conditions under which it would be operated or maintained will not be detrimental to the public health, safety, or welfare of the community to properties or improvements in the vicinity.

**Analysis:** Location - That in accordance with Section 17.82.050 of the Hanford Municipal Code, a planned unit development shall be a minimum five-acre site area, except that there shall be no minimum site area requirements if the site is an infill development site. The planned unit development pertains to a 39.16-acre development, which exceeds the minimum site area for a planned unit development.

Design and Purpose - That planned unit developments are encouraged to achieve a more functional, aesthetically pleasing, and harmonious living and working environment within the City, that otherwise might not be possible by strict adherence to the provisions of the municipal code. In certain instances, the objectives of the municipal code may be achieved by development that does not conform in all respects with the land use pattern designated

on the zoning map or in the zone district prescribed. The planned unit development seeks to:

- ✓ A. To permit a site within more than one (1) zone district to mix the permitted or conditionally permitted land uses of both zones within the site without regard to the zone district boundary.
- ✓ C. To permit the lot patterns on size, shape, and layout that would otherwise not be permitted by the standards of the zone district in which the site is located.
- ✓ D. To modify the required building setbacks, distances between structures, and landscaped areas that would otherwise be required by this title.
- ✓ E. To reduce the amount of required parking spaces when spaces are shared among multiple land uses.

Conditions of Operation – The Hanford Place Master Plan will function, as described in the Master Plan (**Attachment 1**).

Main objectives of the Master Plan include:

#### Zoning and Allowed Uses

Through the Planned Unit Development, the following uses shall be allowed by right. This would apply to all locations on the site and would not be limited by the conceptual site plan:

- All uses listed as permitted or conditionally permitted in the R-H High Density Residential Zone
- All uses listed as permitted or conditionally permitted in the C-S Service Commercial Zone
- Assisted living, skilled nursing, hospice.
- College/university satellite campus
- Hotel
- Residence in the same building as a commercial or office use
- Urgent care clinic

The overall intensity of the total site would be limited by the intensity analyzed in the CEQA document. A higher intensity than that would require an amendment to the PUD. Land use locations are flexible and may change from the conceptual plan. The roadway alignments and ponding basin location would not change.

The included conceptual layout for the site has been prepared by Langdon Wilson Intl. Architecture. Individual sites may be developed independently of the Master Plan, allowing for building size, placement, and use to vary from the character in the illustrations. Revised layout plans would be followed up with specific site plans and parcel maps that would create the public right-of-way.

#### Design Conditions

In order for Hanford Place to have a consistent theme and to operate as a cohesive group of uses, the following design conditions are incorporated into the PUD:

1. Establish that cross-access and shared parking agreements are required for adjacent parcels as they are created prior to, or in conjunction with, parcel map or lot line adjustment approval.
2. Landscaping and lighting design shall be consistent between the sites in the PUD plan area.
3. Uses are not required to obey the zone boundary in the PUD plan area. Uses within the PUD plan area can be from either of the zones within the PUD plan area.
4. A block wall is not required within the PUD plan area between the zones.
5. Additional building setbacks are not required between the two zones within the PUD plan area. The C-S zone required setbacks shall apply to the entire PUD plan area.
6. The maximum building height for the PUD area shall be permit the C-S zone, which is 50 feet.
7. Buildings within the PUD plan area shall have a uniform/cohesive design type, with the exception of standalone residential or hotel buildings, which are not required to have similar design, but shall have compatible colors and design elements. Elevation plans shall be submitted with site plans to confirm compliance. Standards shall be set by the first development in the PUD plan area for succeeding developments.
8. The number of on-site parking spaces shall be as follows:
  - a. Motel or hotel – 1 space per guest room plus 1 space per employee
  - b. Assisted living, skilled nursing facility, or hospice – 1 space for every 4 beds.
  - c. c. multifamily dwellings - at least 50% of spaces shall be covered.
    - ii. one-bedroom - 1.5 spaces per dwelling unit
    - iii. two-bedroom - 1.75 spaces per dwelling unit
    - iv. three or more bedrooms - 2 spaces per dwelling unit
  - d. d. all other allowed uses - 1 space per 350 square feet of building space.
9. A sign program shall be established prior to building permit approval for the first office or commercial use. The sign program would not apply to residential, and hotel/motel uses, which would follow sign standards in the Zoning Ordinance.

All development will be reviewed during the Site Plan Review process when physical development is proposed.

4. That the location and design of the planned unit development will not generate more traffic

than the streets in the vicinity can carry without congestion and will not overload utilities.

**Analysis:** The project has been reviewed in an initial study, for which a traffic impact study (TIS) was conducted.

The study area for the TIS included the following study intersections and roadway segments.

#### Intersections

1. 12th Avenue/Glendale Avenue
2. 12th Avenue/SR-198 westbound (WB) Ramps
3. 12th Avenue/SR-198 eastbound (EB) Ramps
4. Campus Drive/Lacey Boulevard
5. Campus Drive/7th Street
6. Campus Drive/6th Street
7. 11th Avenue/Lacey Boulevard
8. 11th Avenue /7th Street
9. 11th Avenue/6th Street
10. 11th Avenue/5th Street
11. 11th Avenue/4th Street-SR-198 WB On Ramp
12. 11th Avenue/3rd Street-SR-198 EB Off Ramp

#### Segments

1. Lacey Boulevard
  - 12th Avenue to Campus Drive
  - Campus Drive to 11th Avenue
  - 7th Street
  - Campus Drive to 11th Avenue
2. 6th Street
  - Campus Drive to 11th Avenue
3. Glendale Avenue
  - East of 12th Avenue
4. 5th Avenue
  - West of 11th Avenue
- E. Campus Drive
  - Lacey Boulevard to Glendale Avenue

The TIS includes the LOS analysis for the following traffic scenarios:

- Existing Conditions
- Existing Plus Project
- Near-Term Plus Project
- Cumulative Year 2042 Without Project
- Cumulative Year 2042 Plus Project

The TIS concluded that the impact on traffic would be less than significant.

5. That the planned unit development's population density, site area and dimensions, site coverage, yard spaces, height of structures, distances between structures, off-street parking and off-street loading facilities, landscaped areas and street design will produce an environment of stable and desired character consistent with the purpose of this title.

**Analysis:** That the project has been evaluated for consistency with the requirements of Section 17.14 High-Density Residential zone district and 17.20 C-S Service Commercial zone district. All requirements for density, site area, dimensions, site coverage, open space, height of structures, distance between structures, off-street parking and loading facilities, and landscaped areas have been satisfied, except where expressly modified by the Hanford Place Master Plan (PUD 2022-01). The modifications proposed through the Hanford Place Master Plan will produce a cohesive design and an environment of stable and desired character consistent with the purpose of this title. The implementation of medical and mixed-use developments achieves several goals and policies of the General Plan, specifically Goals E1, L2, and L3, and Policies L38-41, L51-55, L11, L107, L135, L137 and P80.

6. That the combination of different dwelling types, architectural appearance, and/or varieties of land uses in the development will complement each other and harmonize with the existing and proposed land uses in the vicinity.

**Analysis:** The Hanford Place Master Plan proposes a medical and mixed-use development on an underutilized, infill parcel, proposed to be designated as C-S Service Commercial and R-H High-Density Residential. Through cohesive design, comprehensive design criteria, and medical-focused uses, with supportive residential, educational, and commercial uses, the Planned Unit Development proposes a design and combination of uses that will complement and harmonize across the zone districts proposed and achieve a goal of the General Plan to promote horizontal mixed-use development. The implementation of medical and mixed-use developments achieves several goals and policies of the General Plan, specifically Goals E1, L2, and L3, and Policies L38-41, L51-55, L11, L107, L135, L137 and P80.

## CONSULTATION

### Early Consultation

Early consultation to agencies outside of the City of Hanford (pursuant to CEQA Guidelines Section 15082) was conducted for the project.

Early consultation was received from:

- Pacific Gas and Electric Company – November 3, 2022 (Reflecting no comments) – **Attachment 3.**
- San Joaquin Valley Air Pollution Control District – November 8, 2022 – **Attachment 4.**
- Santa Rosa Rancheria Tachi-Yokut Tribe – November 9, 2022 – **Attachment 5.**

Early consultation letters are included and analyzed in the initial study.

### Consultation

In accordance with Section 15073 of the California Environmental Quality Act Guidelines, a Notice of Intent to Adopt a Mitigated Negative Declaration was sent to the concerned agencies, mailed to residents within 300 feet of the project site, and posted on CEQANet on July 6, 2023, for a 30-day review period. No comments have been received as of the date of preparation of this report.

## ENVIRONMENTAL ASSESSMENT

Mitigated Negative Declaration No. 2023-93 (SCH Number 2023070011) is recommended for the project based on the following: In accordance with the California Environmental Quality Act (CEQA), General Plan Amendment No. 2022-01, Rezone No. 2022-01, and Planned Unit Development No. 2022-01 were evaluated in an Environmental Assessment/Initial Study. Based on the review, it was determined that the proposed project would not result in a significant adverse impact on the environment with the incorporation of mitigation measures, therefore Mitigated Negative Declaration No. 2023-93 has been prepared, attached as **Attachment 2**.

## PUBLIC COMMENTS

Notice of Public Hearing for the proposed projects was published in the Hanford Sentinel, posted on the Office of Planning and Research (OPR) CEQANet website, and mailed to property owners within 300 ft. of the project site on July 6, 2023. During that time, one comment letter was received:

Adventist Health Systems Comment Letter – **Attachment 6**. The letter details concerns related to the environmental document prepared for the project.

Following receipt of the letter, the applicant conducted various meetings with the Adventist Health team to reach consensus and address the concerns presented within the letter.

The attached letter was received on behalf of Adventist Health Systems on November 12, 2024, indicating project support – **Attachment 7**.

Due to the continuation of the original Planning Commission public hearing, renoticing and recirculation of the Notice of Intent to Adopt a Mitigated Negative Declaration was required. Notice of the Public Hearing was published in the Hanford Sentinel and mailed to property owners within 300 feet of the project site on December 11, 2024.

One additional comment was received on January 9, 2025, from Rhett Swasey. Mr. Swasey is a partner in business at Hanford Veterinary Hospital and has concerns regarding construction impacts of the project and the redesign of Glendale Avenue – full letter attached, **Attachment 8**.

## STAFF RECOMMENDATION

1. Recommend certification of Mitigated Negative Declaration No. 2023-93 for the project to the City Council.
2. Adopt Resolution No. 2025-04, recommending approval of General Plan Amendment No. 2022-01 to the City Council.
3. Adopt Resolution No. 2025-05, recommending approval Rezone No. 2022-01 to the City Council.
4. Adopt Resolution No. 2025-06, recommending approval of Planned Unit Development No. 2022-01 to the City Council.

## RESOLUTION NO. 2025-04

**A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF HANFORD RECOMMENDING APPROVAL OF GENERAL PLAN AMENDMENT NO. 2022-01 TO THE CITY COUNCIL. GENERAL PLAN AMENDMENT NO. 2022-01: A REQUEST TO CHANGE THE GENERAL PLAN DESIGNATION ON 39.16 ACRES FROM HIGHWAY COMMERCIAL TO A COMBINATION SERVICE COMMERCIAL AND HIGH-DENSITY RESIDENTIAL. THE PROJECT IS LOCATED BETWEEN 11<sup>TH</sup> AND 12<sup>TH</sup> AVENUES ALONG GLENDALE DRIVE, NORTH OF HIGHWAY 198 (APN 011-060-007, 011-060-008, 012-290-040, 012-290-042, AND 012-290-054).**

At a regular meeting of the Planning Commission of the City of Hanford duly called and held on January 14, 2025, on motion of Commissioner \_\_\_\_\_, seconded by Commissioner \_\_\_\_\_, and duly carried, the following resolution was adopted:

**WHEREAS**, an application, filed by Steve Brandt – QK, for General Plan Amendment No. 2022-01 requesting a General Plan Amendment to change the General Plan land use designation from Highway Commercial to a combination of Service Commercial and High-Density Residential on approximately 39.16 acres, as shown in **Exhibit A**, was presented to the Hanford City Planning Commission on August 8, 2023; and,

**WHEREAS**, the project is located at between 11<sup>th</sup> and 12<sup>th</sup> Avenues along Glendale Drive, north of Highway 198 (APN 011-060-007, 011-060-008, 012-290-042, and 012-290-054); and

**WHEREAS**, the City of Hanford Planning Commission considered the General Plan Amendment, in accordance with Section 17.88 of the Hanford Municipal Code, at its regularly scheduled meeting on January 14, 2025; and,

**WHEREAS**, the City of Hanford Planning Commission considered the evidence presented in the staff report and testimony presented during the public hearing; and

**WHEREAS**, the Initial Study, Mitigated Negative Declaration No. 2023-93, and all notices related thereto were prepared in compliance with the California Environmental Quality Act (CEQA) and the City of Hanford Municipal Code and Policies; and

**NOW THEREFORE, BE IT RESOLVED**, that the Planning Commission hereby recommends that the City Council of the City of Hanford find that no significant environmental impacts would result from the proposed project with the incorporation of mitigation measures, adopt a Mitigation and Monitoring Reporting Program, attached as **Exhibit B**, and certify that Mitigated Negative Declaration No. 2023-93 was prepared consistent with CEQA and City of Hanford Environmental Guidelines.

**NOW THEREFORE BE IT FURTHER RESOLVED**, that the City of Hanford Planning Commission, in accordance with Section 17.88.040 of the Hanford Municipal Code, recommends approval to the City Council of General Plan Amendment No. 2022-01, based upon the following findings and on the evidence presented:

1. That the amendment is internally consistent with the goals, objectives, and policies of the General Plan and the Municipal Code.

Analysis: That Rezone No. 2022-01 is internally consistent with the goals, objectives, and policies of the General Plan, specifically consistent with Goals E1, L2, and L3, and Policies L38-41, L51-55, L11, L107, L135, L137 and P80. All regulations pertaining to C-S – Service Commercial and R-H High-Density Residential zone district will be enforced as development occurs through the Site Plan Review process, except as expressly modified by the Hanford Place Development Master Plan.

2. The amendment would not be detrimental to the public health, safety, or welfare of the community.

Analysis: That this application has been reviewed by County departments, utility companies, City Fire Department, City Building Department, and other involved departments. Any mitigation required for public health and safety were applied to the proposal and required in the mitigation monitoring and reporting program.

3. The amendment would maintain the appropriate balance of land uses within the City;

Analysis: That jobs-housing balance is achieved by increasing opportunities for people to work and live in close proximity. The ratio is expressed as the number of jobs divided by the number of housing units. The jobs-housing balance is a general tool for analyzing where people work, where they live, and how effectively they can travel between the two. In the planning area, the jobs-housing balance ratio in 2013-2014 was 1.17. It is estimated that the implementation of the General Plan would increase the jobs-housing balance by 0.45 to 1.62, which would make the planning area a jobs-rich area. The proposal to change the designation from Highway Commercial to a combination of Service Commercial and High-Density Residential will impact the job-housing balance projected by increasing the number of residential units in the area. The addition of the residential units to the formerly commercial designation will not affect the City's ability to maintain an appropriate balance of land uses within the City, as the increase in housing will bring more residential units to the jobs-rich planning area.

4. The anticipated land uses on the subject site would be compatible with existing and future surrounding uses.

Analysis: That the Hanford Place Master Plan proposes the development of a medical and mixed-use development on property proposed to be zoned C-S Service Commercial and R-H High-Density Residential. The land uses within the Hanford Place development are compatible with the surrounding land uses and compatible with future surrounding lands uses.

The project will be developed in conformance with the C-S Service Commercial and R-H High-Density Residential zone district regulations, except where expressly modified by the Hanford Place Master Plan (PUD 2022-01).

**THEREFORE, BE IT RESOLVED** that General Plan Amendment No. 2022-01 be recommended for approval to the City Council, subject to the following condition(s):

**ADMINISTRATION DEPARTMENT**

Contact the City Attorneys' Office: (559) 584-6656

Concerning questions that you may have on the conditions listed below:

**Defense and Indemnification Provisions:**

1. That the applicant shall defend, indemnify, and hold harmless the City of Hanford ("City"), its officials, officers, employees, representatives, agents and attorneys, from and against all claims, damages, losses, judgments, liabilities, expenses and other costs, including litigation costs and attorney's fees, arising out of, resulting from, or in connection with, the City's act or acts leading up to and including approval of any environmental document and/or granting of any approvals relating to the Project. Applicant's obligation to defend, indemnify and hold the City harmless specifically includes, but is not limited to, any suit or challenge by any third party against the City which challenges or seeks to set aside, void or annul the legality or adequacy of any environmental document approved by the City or any approval related to the Project.

**PASSED AND ADOPTED** at a regular meeting of the Hanford City Planning Commission by the following votes:

AYES: Commissioners  
 NOES: Commissioners  
 ABSTAIN: Commissioners  
 ABSENT: Commissioners

STATE OF CALIFORNIA )  
 COUNTY OF KINGS )ss.  
 CITY OF HANFORD )

I, **Jason Waters**, Secretary of the City of Hanford Planning Commission, do hereby certify the foregoing resolution was duly passed and adopted by the Planning Commission of the City of Hanford at a regular meeting thereof held on the 14<sup>th</sup> day of January, 2025.

| <b>Biological Resources</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <i>Will the project:</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Mitigation Measures</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <p><b>Mitigation Measure BIO-1</b> Conduct Preconstruction Clearance Surveys for San Joaquin Kit Fox and Burrowing Owl. A preconstruction clearance survey is required for San Joaquin kit fox and burrowing owl no more than 30 calendar days prior to initiation of project activities. All survey results must be delivered to the United States Fish and Wildlife Service's (USFWS), the California Department of Fish and Wildlife (CDFW), and the City. If the survey results find an active burrow of one or both of these species on the project site, the applicant must coordinate with the applicable resource agencies (CDFW for burrowing owl, CDFW and USFWS for kit fox) to obtain applicable agency approval(s)/permit(s) prior to any ground disturbance activities on the site.</p> <p>Specific avoidance, den excavation, passive relocation, and compensatory mitigation activities shall be performed as required by the applicable agency. Appropriate provisions of the CDFW Staff Report on Burrowing Owl Mitigation and USFWS Standardized Recommendations for Protection of the Endangered San Joaquin Kit Fox shall be adhered to.</p> |
| <p><b>Mitigation Measure BIO-2</b> Worker Environmental Awareness Training. Prior to initial groundbreaking, Worker Environmental Awareness Training shall be conducted by a qualified biologist to educate all construction personnel on the relevant federal, state, and local laws related to potentially occurring special-status species at the site. The tailgate session shall include training on identification of species that may be found on the project site, the status of those species, and any legal protection afforded to those species. Personnel will be advised to report any special-status species encountered promptly. A fact sheet conveying this information will be prepared for display or for distribution to anyone who may enter the project site.</p>                                                                                                                                                                                                                                                                                                                                                                           |
| <p><b>Mitigation Measure BIO-3</b> Construction Site Housekeeping and Operational Requirements. Habitat subject to permanent and temporary construction disturbances and other types of ongoing project-related disturbance activities shall be minimized by adhering to the following USFWS Standardized Recommendations for Protection of the Endangered San Joaquin Kit Fox:</p> <p>a) To minimize temporary disturbances, all project-related vehicle traffic shall be restricted to established roads, construction areas, and other designated areas. These areas shall also be included in preconstruction surveys and, to the extent possible, shall be established in locations disturbed by previous activities to prevent further impacts.</p>                                                                                                                                                                                                                                                                                                                                                                                                         |

b) Project-related vehicles shall observe a daytime speed limit of 20-mph throughout the site in all project sites, except on county roads and state and federal highways; this is particularly important at night when kit foxes are most active. Night-time construction shall be minimized to the extent possible. However, if it does occur, then the speed limit shall be reduced to 10-mph. Off-road traffic outside of designated project sites shall be prohibited.

c) To prevent inadvertent entrapment of kit foxes or other animals during the construction phase of a project, all excavated, steepwalled holes or trenches more than 2-feet deep shall be covered at the close of each working day by plywood or similar materials. If the trenches cannot be closed, one or more escape ramps constructed of earthen-fill or wooden planks shall be installed. Before such holes or trenches are filled, they shall be thoroughly inspected for trapped animals. If at any time a trapped or injured kit fox is discovered, the USFWS and the CDFW shall be contacted.

d) Kit foxes are attracted to den-like structures such as pipes and may enter stored pipes and become trapped or injured. All construction pipes, culverts, or similar structures with a diameter of 4-inches or greater that are stored at a construction site for one or more overnight periods shall be thoroughly inspected for kit foxes before the pipe is subsequently buried, capped, or otherwise used or moved in any way. If a kit fox is discovered inside a pipe, that section of pipe shall not be moved until the USFWS and CDFW have been consulted. If necessary, and under the direct supervision of a qualified biologist, the pipe may be moved only once to remove it from the path of construction activity, until the fox has escaped. In the case of trapped animals, escape ramps or structures shall be installed immediately to allow the animal(s) to escape, or the USFWS and CDFW should be contacted for further guidance.

e) All food-related trash items such as wrappers, cans, bottles, and food scraps shall be disposed of in securely closed containers and removed at least once a week from a construction or project site.

f) Pets, such as dogs or cats, shall not be permitted on the project site to prevent harassment, mortality of kit foxes, or destruction of dens.

g) Use of rodenticides and herbicides in project sites shall be restricted. This is necessary to prevent primary or secondary poisoning of kit foxes and the depletion of prey populations on which they depend. All uses of such compounds shall observe label and other restrictions mandated by the U.S. Environmental Protection Agency, California Department of Food and Agriculture, and other state and federal legislation. If rodent control must be conducted, zinc phosphide should be used because of a proven lower risk to kit fox.

**Mitigation Measure BIO-4** Nesting Bird Surveys and Avoidance. If vegetation removal, construction, or grading activities are planned to occur within the active nesting bird season (February 15 through September 15), a qualified biologist shall conduct a preconstruction nesting bird survey no more than 5 days prior to the start of such activities. The nesting bird survey shall include the project site and areas immediately adjacent to the site that could potentially be affected by project-related activities such as noise, vibration, increased human activity, and dust, etc. For any active nest(s) identified, the qualified biologist shall establish an appropriate buffer zone around the active nest(s). The appropriate buffer shall be determined by the qualified biologist based on species, location, and the nature of the proposed activities. Project activities shall be avoided within the buffer zone until the nest is deemed no longer active by the qualified biologist.

**Mitigation Measure BIO-5** Agency Coordination for Peoples Ditch. Prior to any modifications to Peoples Ditch, it is recommended to consult with the United States Army Corps of Engineers (USACE), CDFW, and Regional Water Quality Control Board (RWQCB) to verify the feature's jurisdictional status and obtain applicable permit(s) and/or authorization(s). A notification of streambed alteration should be submitted to the CDFW in accordance with Section 1602 of the California Fish and Game Code. Unless categorically excluded under effective definitions or existing documentation confirms that no permit is needed, the Central Valley RWQCB and Sacramento District of the USACE should be consulted regarding potential permitting needs under the California Water Code and federal Clean Water Act, respectively, associated with the proposed Peoples Ditch modifications.

### **Cultural Resources**

#### *Will the project:*

Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?

Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

Disturb any human remains, including those interred outside of formal cemeteries?

### **Mitigation Measures**

**Mitigation Measure CULT-1** Because of the very high sensitivity of the soil type in the project area, the possibility exists that buried archaeological deposits within the project site. Therefore, archaeological monitoring must be conducted during ground-disturbing construction activities in native soil, including clearing and grubbing. Monitoring should occur on a full-time basis during all excavation activities until the Project Archaeologist, based on the archaeological monitor's observations, is satisfied that there is little likelihood of encountering intact archaeological deposits. The Project Archaeologist may also determine it is appropriate to reduce monitoring to spot-checking or on a part-time basis. Upon completion of the monitoring and, if necessary, mitigation, the archaeologist should prepare a report to document the methods and results of the monitoring. The final report should be submitted to the SSJVIC.

**Mitigation Measure CULT-2** Additional mapping and subsurface testing of AE-4167-01 shall be conducted to evaluate its eligibility for inclusion in the California Register of Historical Resources, pursuant to California Public Resources Code (PRC) 5024.1. Additional focused subsurface testing in areas not previously disturbed by historic-era activities must be conducted to confirm presence/absence of high-sensitivity paleosols that may include intact prehistoric cultural deposits. If intact prehistoric cultural deposits are encountered during subsurface presence/absence testing, further investigation must be conducted to determine if the deposit retains integrity and is eligible for inclusion in the California Register of Historical Resources. The methods and findings of the additional studies would be presented as an addendum to the Cultural Resource Inventory for the Hanford Place Medical and Mixed-Use Property Project and would include cultural resource management recommendations to guide mitigation of potential adverse effects to any identified historical resources within the project area.

**Mitigation Measure CULT-3** Any human remains encountered during project-related ground disturbing activities shall be treated in accordance with California Health and Safety Code Section 7050.5. The project sponsor shall inform all contractor(s) performing excavation of the sensitivity of the project site for human remains and include the following directive in the appropriate contract documents: If human remains are uncovered, all work within 50 feet of the discovery shall be halted and the Kings County Coroner notified immediately. At the same time, the on-site monitoring archaeologist shall assess the situation and consult with agencies as appropriate.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Project personnel shall not collect or move any human remains or associated materials. If the human remains are of Native American origin, the Coroner must notify the California State Native American Heritage Commission (NAHC) within 24 hours of this identification. The NAHC will formally identify a Native American Most Likely Descendant (MLD)—if one is not already on-site—to inspect the site and provide recommendations for the proper treatment of the remains and associated grave goods. Such recommendations shall be carried out to the satisfaction of the NAHC prior to work resuming within 50 feet of the discovered remains.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Mitigation Measure CULT-4</b> A Burial Treatment Plan shall be entered into by the project applicant/property owner prior to any ground disturbing activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

Directly or indirectly destroy a unique paleontological                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Mitigation Measures</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Mitigation Measure GEO-1</b> To reduce the potential for soil erosion during construction of the proposed project, an Erosion Control Plan shall be prepared for the project in conformance with the California Storm Water Best Management Practice Handbook for Construction Activity, prior to the start of grading.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Mitigation Measure GEO-2</b> The project applicant shall inform its contractor(s) of the sensitivity of the project area for paleontological resources. Should paleontological resources be encountered during project subsurface construction activities, all ground-disturbing activities within 25 feet shall be redirected and a qualified paleontologist contacted to assess the situation, consult with agencies as appropriate, and make recommendations for the treatment of the discovery. If found to be significant, and project activities cannot avoid the paleontological resources, adverse effects to paleontological resources shall be mitigated. Mitigation may include monitoring, recording the fossil locality, data recovery and analysis, a final report, and accessioning the fossil material and technical report to a paleontological repository. Public educational outreach may also be appropriate. Upon completion of the assessment, a report documenting methods, findings, and recommendations shall be prepared and submitted to the City for review, and (if paleontological materials are recovered) a paleontological repository, such as the University of California Museum of Paleontology (UCMP). The City shall verify that the above directive has been included in the appropriate contract documents. |
| <b>Greenhouse Gas Emissions</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Mitigation Measures</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Mitigation Measure GHG-1</b> In order to meet the 2022 Scoping Plan greenhouse gas (GHG) requirements, consistent with State GHG reduction and equity prioritization goals, the proposed project shall provide electric vehicle charging capabilities that meet the most ambitious voluntary standard in the California Green Building Standards Code at the time of project approval as part of the final project design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <p><b>Mitigation Measures</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <p><b>Mitigation Measure HYDRO-1</b> To minimize any potential short-term water quality effects from project-related construction activities, the project contractor shall implement Best Management Practices (BMPs) in conformance with the California Storm Water Best Management Practice Handbook for Construction Activity. In addition, the proposed project shall be in compliance with existing regulatory requirements, including the Water Pollution Control Preparation (WPCP) Manual. In addition, implementation of a Storm Water Pollution Prevention Plan (SWPPP) would be required under the National Pollutant Discharge Elimination System (NPDES) to regulate water quality associated with construction activities.</p> |
| <p><b>Mitigation Measure HYDRO-2</b> To reduce the potential for degradation of surface water quality during project operation, a Storm Water Management Plan (SWMP) shall be prepared for the proposed project. The SWMP shall describe specific programs to minimize storm water pollution resulting from the proposed project. Specifically, the SWMP shall identify and describe source control measures, treatment controls, and BMP maintenance requirements to ensure that the project complies with post-construction storm water management requirements of the Regional Water Quality Control Board (RWQCB).</p>                                                                                                                   |
| <p><b>Noise</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <p><i>Will the Project?</i></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <p>a. | <p><b>Mitigation Measure</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <p><b>Mitigation Measure NOI-1 Truck Movements.</b> All truck movements occurring during nighttime hours of 10:00 p.m. to 7:00 a.m. shall be required to use the Glendale Avenue access point only.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

**Mitigation Measure NOI-2** The project contractor shall implement the following measures during construction of the project:

- Per the City of Hanford Municipal Code, construction activities should not occur outside the hours of 7:00 a.m. to 8:00 p.m.
- All construction equipment shall be properly maintained and muffled as to minimize noise generation at the source.
- Noise-producing equipment shall not be operating, running, or idling while not in immediate use by a construction contractor.
- All noise-producing construction equipment shall be located and operated, to the extent possible, at the greatest possible distance from any noise-sensitive land uses.
- Locate construction staging areas, to the extent possible, at the greatest possible distances from any noise-sensitive land uses.
- Signs shall be posted at the construction site and near adjacent sensitive receptors displaying hours of construction activities and providing the contact phone number of a designated noise disturbance coordinator.

**Mitigation Measure NOI-3 Exterior Noise Levels.** The final design shall include a minimum 6.5- foot above-ground level sound wall around outdoor activity areas associated with the proposed hotel and apartment land uses to mitigate exterior noise levels to below 65 dB Ldn within these outdoor activity areas.

**Mitigation Measure NOI-4 Interior Noise Levels.** Once building-specific construction plans become available, interior noise levels should be reviewed and calculated by a qualified acoustical consultant to determine if additional noise attenuation mitigation measures are required to comply with interior noise level standards.

#### **Tribal Cultural Resources**

*Will the project:*

a. Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

- i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)?  
Or
- ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

#### **Mitigation Measures**

See Mitigation Measures CULT-1 through CULT-4,

#### **Utilities and Service System**

*Will the project:*

Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

## RESOLUTION NO. 2025-05

**A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF HANFORD RECOMMENDING APPROVAL OF REZONE NO. 2022-01 TO THE CITY COUNCIL. REZONE NO. 2022-01 IS A REQUEST TO CHANGE THE ZONING DESIGNATION C-H HIGHWAY COMMERCIAL TO A COMBINATION OF C-S SERVICE COMMERCIAL AND R-H HIGH-DENSITY RESIDENTIAL ON 39.16 ACRES. THE PROJECT IS LOCATED BETWEEN 11<sup>TH</sup> AND 12<sup>TH</sup> AVENUES ALONG GLENDALE DRIVE, NORTH OF HIGHWAY 198 (APN 011-060-007, 011-060-008, 012-290-040, 012-290-042, AND 012-290-054).**

At a regular meeting of the Planning Commission of the City of Hanford duly called and held on January 14, 2025, on motion of Commissioner \_\_\_\_\_, seconded by Commissioner \_\_\_\_\_, and duly carried, the following resolution was adopted:

**WHEREAS**, an application, filed by Steve Brandt of QK for Rezone No. 2022-01, : a request to change the zoning on 39.16 acres from C-H Highway Commercial to C-S Service Commercial and R-H High-Density Residential with a Planned Unit Development overlay, as shown in **Exhibit A**, was presented to the Hanford City Planning Commission on January 14, 2025; and,

**WHEREAS**, the City of Hanford Planning Commission considered the Rezone, in accordance with Section 17.86 of the Hanford Municipal Code, at its regularly scheduled meeting on January 14, 2025; and,

**WHEREAS**, the City of Hanford Planning Commission considered the evidence presented in the staff report and testimony presented during the public hearing; and

**WHEREAS**, the Initial Study, Mitigated Negative Declaration No. 2023-93, and all notices related thereto were prepared in compliance with the California Environmental Quality Act (CEQA) and the City of Hanford Municipal Code and Policies; and

**NOW THEREFORE, BE IT RESOLVED**, that the Planning Commission hereby recommends that the City Council of the City of Hanford find that no significant environmental impacts would result from the proposed project with the incorporation of mitigation measures, adopt a Mitigation and Monitoring Reporting Program, attached as **Exhibit B**, and certify that Mitigated Negative Declaration No. 2023-93 was prepared consistent with CEQA and City of Hanford Environmental Guidelines.

**NOW THEREFORE BE IT FURTHER RESOLVED**, that the City of Hanford Planning Commission, in accordance with Section 17.86.030 of the Hanford Municipal Code, recommends approval to the City Council of Rezone No. 2022-01 based upon the following findings and on the evidence presented:

1. That the amendment is internally consistent with the goals, objectives, and policies of the General Plan and the Municipal Code.

Analysis: That Rezone No. 2022-01 is internally consistent with the goals, objectives, and policies of the General Plan, specifically consistent with Goals E1, L2, and L3, and Policies L38-41, L51-55, L11, L107, L135, L137 and P80. All regulations pertaining to C-S – Service Commercial and R-H High-Density Residential zone district will be enforced as development

occurs through the Site Plan Review process, except as expressly modified by the Hanford Place Development Master Plan.

2. The amendment would not be detrimental to the public health, safety, or welfare of the community.

Analysis: That this application has been reviewed by County departments, utility companies, City Fire Department, City Building Department, and other involved departments. Any mitigation required for public health and safety were applied to the proposal and required in the mitigation monitoring and reporting program.

3. The amendment would maintain the appropriate balance of land uses within the City;

Analysis: That jobs-housing balance is achieved by increasing opportunities for people to work and live in close proximity. The ratio is expressed as the number of jobs divided by the number of housing units. The jobs-housing balance is a general tool for analyzing where people work, where they live, and how effectively they can travel between the two. In the planning area, the jobs-housing balance ratio in 2013-2014 was 1.17. It is estimated that the implementation of the General Plan would increase the jobs-housing balance by 0.45 to 1.62, which would make the planning area a jobs-rich area. The proposal to change the designation from Highway Commercial to a combination of Service Commercial and High-Density Residential will impact the job-housing balance projected by increasing the number of residential units in the area. The addition of the residential units to the formerly commercial designation will not affect the City's ability to maintain an appropriate balance of land uses within the City, as the increase in housing will bring more residential units to the jobs-rich planning area.

4. The anticipated land uses on the subject site would be compatible with existing and future surrounding uses.

Analysis: That the Hanford Place Master Plan proposes the development of a medical and mixed-use development on property proposed to be zoned C-S Service Commercial and R-H High-Density Residential. The land uses within the Hanford Place development are compatible with the surrounding land uses and compatible with future surrounding lands uses.

| Direction | Existing Land Use                                                    | General Plan Designation                                | Zone District                                                             |
|-----------|----------------------------------------------------------------------|---------------------------------------------------------|---------------------------------------------------------------------------|
| North     | Railroad; Adventist Health Medical Center; single-family residential | Office; Office Residential                              | O Office; O-R Office Residential                                          |
| South     | CA-198; car dealership; basin; single-family residential             | Highway Commercial, Open Space, Low-Density Residential | C-H Highway Commercial, PF Public Facility, R-L-5 Low-Density Residential |
| East      | Integrate shopping center – grocery, retail, gym, restaurant         | Regional Commercial                                     | C-R Regional Commercial                                                   |
| West      | Veterinary hospital, mini-storage, California Highway Patrol, hotel  | Highway Commercial                                      | C-H Highway Commercial                                                    |

The project will be developed in conformance with the C-S Service Commercial and R-H High-Density Residential zone district regulations, except where expressly modified by the Hanford Place Master Plan (PUD).

**THEREFORE, BE IT RESOLVED** that Rezone No. 2022-01 be recommended for approval to the City Council, subject to the following condition(s):

**ADMINISTRATION DEPARTMENT**

Contact the City Attorneys' Office: (559) 584-6656

Concerning questions that you may have on the conditions listed below:

**Defense and Indemnification Provisions:**

1. That the applicant shall defend, indemnify, and hold harmless the City of Hanford ("City"), its officials, officers, employees, representatives, agents and attorneys, from and against all claims, damages, losses, judgments, liabilities, expenses and other costs, including litigation costs and attorney's fees, arising out of, resulting from, or in connection with, the City's act or acts leading up to and including approval of any environmental document and/or granting of any approvals relating to the Project. Applicant's obligation to defend, indemnify and hold the City harmless specifically includes, but is not limited to, any suit or challenge by any third party against the City which challenges or seeks to set aside, void or annul the legality or adequacy of any environmental document approved by the City or any approval related to the Project.

**PASSED AND ADOPTED** at a regular meeting of the Hanford City Planning Commission by the following votes:

AYES: Commissioners  
NOES: Commissioners  
ABSTAIN: Commissioners  
ABSENT: Commissioners
